For description of these six roses, see pages 17 and 21.

THE KRIDER NURSERIES
INCORPORATED
MIDDLEBURY, INDIANA, U. S. A.

Foreword

*"For Those Who Realize
the Value of Quality"*

For thirty-four years—ever since The Krider Nurseries were established—it has been our wish that all our friends and customers might visit our nursery and that we might show you the home of the flowering and fruiting stock that is being sent you under our labels.

Thousands do visit our nursery and we extend to all of you an invitation to drive in. We have 420 acres in one block at Middlebury, Indiana. Our office is three blocks from the center of the village and we have laid out four miles of drives through our nursery. You can drive your car past millions of shrubs and evergreens in full bloom and beauty. Acres of roses and acres of philox in bloom in season. Rest and eat your lunch in the shade of the trees near the lily pools, fed by natural springs, where we grow a complete line of water lilies and water plants that bloom throughout the summer months. You will enjoy an afternoon with us and a cordial welcome awaits you.

But such a trip being impractical to the vast majority of you we are doing the next best thing; we are sending you facsimiles of the fruit and flowers we grow. We are presenting you a catalog which not only brings form and color to your vision, but those more subtle qualities—the appetizing plumpness of the apple, the luscious quality of the peach, the juiciness of the berry, and the glorious shadings of the colorful rose. In all respects save perfume—and by the grace of the imagination you may have even that in these pages—you have in this catalog a literal presentation of what your garden and orchard may produce from our stock.

It is only by a comparison of the hardy, thrifty, sure to bear stock with weak

GUARANTEE

The Krider Nursery Co., Inc., guarantee that each plant, shrub and tree shall be of a size and quality as shown in this catalog and that it will reach customer in good growing condition. The company will replace free of charge any stock not in good condition when it reaches customer upon receipt of freight or express bill properly signed by the agent with a notation of the loss or damage entered thereon.

The Krider Nurseries guarantee all parcel post shipments to reach customer in good condition but complaints must be made within five days after goods are received.

The company further agrees to replace at one-half regular catalog price any shrub or tree dying during the first year after planting provided written report is made before October 1st following date of purchase.

The company further guarantees that every plant, shrub, or tree is true to name and will replace free of charge or refund purchase price of any proven not to be so, but it is mutually agreed between purchaser and ourselves that we will not be held for any greater amount than the original purchase price.

inferior plants that will dwindle and pine away and finally "peter out" that you can be convinced of the meaning of the phrase, "for those who realize the value of quality."

It means success instead of failure, it means satisfaction instead of disappointment. It means the joy of achievement and success, whether it be a rose, a rock garden or a whole orchard.

Krider's hardy northern grown, true-to-name stock will please you. The best is none too good. Don't waste years of time on inferior stock when just a few cents means the difference between vigor and weakness.

For thirty-four years we have served you. We have grown from small to big. Our vigorous stock has undoubtedly appealed to you or you would not have re-ordered again and again as many of our old customers do from year to year. You have told others, our best advertisement.

Look over our prices. They are as low as good stock can sell for. Higher prices can buy no better quality.

Order abundantly today, with eye to future need, that you and yours may harvest with both pleasure and profit.

Special Premiums for Early Orders

As a rule most people wait until the first warm, sunny days of spring before they begin to think of ordering trees, plants and vines. Then they all send in their orders at one time, and to take care of these orders promptly we have to employ extra clerks and packers. If we can induce part or all of our patrons to send in their orders early we can distribute this work over a longer period of time and not only handle the orders better, but with a much smaller force of men and women. This means a considerable saving of time and money to us, and is the one and only reason we can make the liberal premium offer as set forth below.

REMEMBER THE DATE BEFORE THIS OFFER EXPIRES

For all spring orders amounting to \$5.00 received before March 15th, we will allow you to select \$1.00 worth of any fruit or shrubbery listed in our catalog. For all orders amounting to \$10.00 we will allow you to select \$2.00 worth. For all \$20.00 orders, \$4.00 worth, and for all \$50.00 orders, \$12.00 worth; for all \$100.00 orders, \$25.00 worth.

No special premiums after date given above and no discount on special collections.

General Information

LOCATION. Our plant is located at Middlebury, Ind. Here we have our offices and 410 acres of as fine nursery growing land as can be found. We are on U. S. 20 from Boston to Chicago half way between Lagrange, Ind., and Elkhart, Ind. Ten miles northeast of Goshen, Ind., and 12 miles south of U. S. 112, which you leave at White Pigeon, Mich.

ORDERING. In ordering be sure to state how you want your orders sent and give your express office. Order early. On all orders of one dollar or more received before March 10, we will add a Rambler Rose as a premium, providing you mention it in your order.

SUBSTITUTION. We do not substitute unless requested. When you place your order here you get what you want or your money back.

REFERENCES. First State Bank, Middlebury, Indiana; Elkhart County Trust Company, Goshen, Indiana, or any bank or business house in Elkhart County.

SHIPMENT. We commence to ship about March 10th, weather being favorable, and shipping season lasts until May 25th. We ship order any week you designate in your letter, weather being favorable. We have every means at hand to have your stock reach you in the best condition.

TERMS. Cash before order is shipped. We will book orders when one-fourth cash accompanies the order, balance to be paid before stock is shipped.

CLAIMS. All claims for shortage must be made inside of ten days after goods are received. If stock is not satisfactory, complaint must be made at once. No attention will be paid to claims received months after the goods have been received.

PARCEL POST. Strawberry plants can be sent by Parcel Post. If you wish them sent in this manner add 15c per 100, or we can send them Parcel Post collect, whichever is preferred. Rural carriers collect postage and it is cheaper than express and brings plants to your door.

REMITTANCES. Make same by express money order, post office order, draft or registered letter. Checks from responsible persons are also taken. Please do not send stamps.

CONCLUSION. We offer our customers five essentials necessary to success and embodied in stock grown by us.

1. **100 PER CENT PRODUCTIVE.** Why do some plants and trees produce big crops and others very little? It's all in the breeding. You can improve berry plants and fruit trees just as easy as you can horses, hogs or corn. By means of careful selection we have greatly increased the fruiting capacity of every variety we offer. All drones and unproductive plants have been eliminated. Every Krider plant and tree produces a full crop of strictly first quality fruit.

2. **100 PER CENT HEALTHY.** Double your crops and profits by planting disease-free stock. Healthy plants and trees will give you big profits for many years, while on the other hand many of the failures in the fruit business can be traced directly to the diseased stock that was planted. We know the importance of planting healthy stock, therefore, take every precaution to prevent disease.

3. **100 PER CENT VIGOROUS.** Every Krider plant, tree, shrub or vine has a perfect root system and that is why thousands of growers have succeeded with our stock after failing with others. Our ideal soil and exclusive methods of culture and propagation provide every Krider production with an ideal root system that makes your success certain even under the most unfavorable conditions.

4. **100 PER CENT HARDY.** Ask anybody that knows and they will tell you that our hardy, Northern grown nursery stock is the most dependable, the most productive, and the most profitable that can be obtained. Our mild, even temperature during the growing season brings our stock to perfect maturity and every specimen is strong, stocky, sturdy and evenly proportioned.

5. **100 PER CENT TRUE-TO-NAME.** Our reputation for reliability and honest, fair and square treatment has never been questioned and when you place your confidence in the Krider Nurseries you are going to get exactly what you order. If we cannot furnish it we will tell you so. Keeping our stock pure and true-to-name is a big business in itself but that we do it is attested by the thousands of customers who order from us year after year.

Think It Over

Residence of Vernon H. Krider.

1. Colorado Blue Spruce. 2. Concolor Fir. 3. Austrian Pine. 4. Mugho Pine.
5. Pyramidal Arbor-Vitae. 6. Savin Juniper.

Coniferous Evergreens

CAUTION. Do not buy cheap evergreens. Do not let the sun or wind strike the roots of evergreens even for a few minutes; you will kill them if you do. Every conifer offered in this catalog, unless otherwise stated, is taken from the field with the roots securely closed in a ball of earth and this bound on with a piece of burlap. The roots are never exposed. When you receive the plants, have hole ready, remove burlap (but not dirt), plant immediately, water thoroughly but do not apply over foliage. Balling is not necessary with 4-year evergreens which will be packed in moss and sent parcel post.

Special Offer on Four-Year Evergreens Bargain Offer No. 101

1 Colorado Blue Spruce, 8-12 in. XX Each, 50c	} 3 for 98c Postpaid
1 Austrian Pine, 9-12 in. XX Each, 50c	
1 Mugho Pine, 8-12 in. XX Each, 50c	

Bargain Offer No. 102

1 Concolor Fir, 8-12 in. XX Each, 50c	} 3 for 98c Postpaid
1 Pyramidal Arbor-Vitae, 9-12 in. XX Each, 50c	
1 Savin Juniper, 9-12 in. XX Each, 50c	

Send us five names and addresses of friends interested in evergreens and we will send you both above collections for \$1.59, postpaid. The two collections will make a planting similar to above. Plant in the garden two years and they will grow 2 feet high.

Abies - The Firs

This family embraces many different forms and characters. They are pyramidal, erect and spreading; foliage varying in color from light to dark green, to gold and blue. They possess the vigor to establish themselves in any type of soil and will thrive in clay, stony and poorer soils where some evergreens may fail. **Douglas Fir.** One of the finest of all specimen evergreens. Resembles Blue Spruce. Add this one to your selection. XX 6-12 in., 25c; 12-18 in., \$1.00; 2-3 ft., \$3.00 each; 3-4 ft., \$5.00 each.

Juniperus - Junipers or Cedars

Trees are generally pyramidal in shape and hardy everywhere. The needles are short and generally bright on the under side. They transplant kindly and should be more generally used. They are nearly all native of the northern country and more handsome in cultivation than in their native soil.

Virginiana (Red Cedar). A well known native tree; varies much in habit and color of foliage; very attractive in winter when the golden bronze of the young growth contrasts with the dark green of the older. 18-24 in., \$1.00; 2-3 ft., \$2.00; 3-4 ft., \$3.00.

Glauca (Blue Cedar). Similar to Red Cedar in form and of a soft blue-green color; closely columnar. 18-24 in., \$2.00; 2-3 ft., \$3.00.

Hibernica (Irish Juniper). Of slender columnar habit with glaucous green foliage. Useful for formal plantings. 18-24 in., \$1.00; 2 ft., \$2.00; 3 ft., \$3.00.

Pfitzeriana (Pfitzer Juniper). A graceful, broad, pyramidal evergreen with sweeping fronds of gray-green foliage, making in time a distinctive, beautiful tree. XXX 12-18 in., \$1.00; 18-24 in., \$2.50; 2-3 ft., \$3.00.

Sabina (Savin Juniper). Especially suitable for hillside planting or among rocks; like a prostrate shrub in habit, and useful for all low planting. The foliage is deep green and unchanging in its color. 12-18 in., \$1.00; 18-24 in., \$2.50; 2-3 ft., \$3.00.

Arbor-Vitae

American. One of the finest Evergreens for hedges. It grows rapidly and soon forms a most beautiful hedge; very dense. Of course it is never adapted to turn stock, but it forms a most desirable and ornamental screen to divide the lawn from other parts of the grounds. 12-18 in., 50c; 18-24 in., 75c; 2-2½ ft., \$1.25; 2½-3 ft., \$1.50; 3-4 ft., \$3.00.

Pyramidalis. An exceedingly beautiful, bright variety, resembling the Irish Juniper in form; foliage a deep green, color well retained in winter; perfectly hardy. Should have a place in every collection. 12-18 in., 75c; 18-24 in., \$1.00; 2-3 ft., \$2.00; 3-4 ft., \$5.00.

Compacta. Foliage light green; habit dwarf and compact. Fine for small places. 12-15 in., \$1.00; 15-18 in., \$2.00.

Peabody Golden. Very beautiful, attaining a size of 8-10 ft. 10-12 in., \$1.00; 12-18 in., \$2.00; 2-3 ft., \$5.00.

Tom Thumb. Small compact, with feathery foliage. A beautiful ornament for small yard or cemetery lot or low hedge. 12-15 in., \$1.00; 15-18 in., \$2.00; 18-24 in., \$3.00.

Globosa. Forms a dense, low, globe shape. A beautiful Evergreen. Particularly fine for formal plantings. 12-15 in., \$1.00; 15-18 in., \$2.00.

Hovey's Golden. A small tree, globular in form; foliage light green with a golden tinge and very compact; hardy. 12-15 in., \$1.00; 15-18 in., \$2.00; 18-24 in., \$3.00.

Picea - The Spruces

These are all easy to transplant, and the most popular of the Evergreen family. They are perfectly hardy and grow rapidly and are pyramidal in shape, used for specimens in groups or for foundation adornment, and as screens, windbreaks or hedges they are equally appropriate. Needles are uniformly short. We have a fine stock of sheared plants that will please every purchaser.

Colorado Blue (*Picea pungens glauca*). This species has been tested at various points on the prairies of the West and Northwest with perfect success, enduring a temperature of 30 degrees below zero in exposed situations, entirely uninjured. This is not only one of the hardiest, but the most beautiful in color and outline; of a rich blue or sage color; it is a valuable acquisition. 8-10 in., 25c; XX, 10-12 in., 75c; XXX, 12-18 in., \$2.50; 18-24 in., \$5.00; XXX, 2-3 ft., \$8.00.

Norway. A lofty, elegant tree of perfect pyramidal habit, remarkably elegant and rich, and as it gets age, has fine, graceful, pendulous branches; it is exceedingly picturesque and beautiful. Very popular, and deservedly so. One of the best Evergreens for hedges and windbreaks. XX, 12-18 in., 50c; XXX, 18-24 in., \$1.00; XXX, 2-3 ft., \$2.00.

Hemlock (*Tsuga canadensis*). An elegant pyramidal tree, with drooping branches and delicate dark foliage, like that of the yew. Distinct from all other trees. It is a beautiful lawn tree and makes a highly ornamental hedge. XX, 12-18 in., \$1.00; XXX, 18-24 in., \$2.00; XXX, 2-3 ft., \$3.50.

Pinus - The Pines

Pines seem to grow anywhere, high or low ground, exposed or shaded position, in rich or poor soils, they are at home. After established they grow rapidly and when given space quickly raise their heads and spread their great branches, soon making a wonderful tree. The needles are invariably long and with age droop gracefully. Plant any kind and be assured of getting quick results.

White (*Pinus strobus*). The most ornamental of all native Pines; foliage light delicate or silvery green. XX, 12-18 in., \$1.00; XXX, 18-24 in., \$2.00; XXX, 2-3 ft., \$2.50.

Mugho (*P. mugho*). This is an excellent dwarf Pine, being globe shaped and erect branching when the new growth, which seems like miniature candles, completely covers the bush. XX, 5-6 in., 25c; 12-15 in., \$2.00; 15-18 in., \$2.50.

Retinispora

Pisifera (Pea-Fruited Retinispora). Erect branches, pendulous at the tips; foliage feathery, light green, glaucous beneath. 12-15 in., \$1.00; 15-18 in., \$2.00; 18-24 in., \$3.00.

Plumosa (Green Retinispora). Densely conical, with fernlike leaves of bright green carried on erect, plummy branches. XXX, 15 in., \$1.50; XXX, 18 in., \$2.00; 18-24 in., \$3.00.

Plumosa aurea (Golden Retinispora). One of the few really golden Evergreens. The color of the young growth contrasts strongly with the darker shade of the older foliage. Striking and useful in many ways. 12-15 in., \$1.00; 15-18 in., \$2.00; 18-24 in., \$3.00.

NOTE.—(X) means number of times transplanted. Write for prices on large specimen evergreens, 6-8 ft. high. We have them.

6-year-old Specimen Pyramidal Arbor-Vitae.
18 to 24 in., \$1.00 each; 2 to 3 ft., \$2.00, B&B.

Shade Trees for Lawn and Roadside

Mulberry - Morus

Teas' Weeping Russian. A weeping variety of the new well-known Russian Mulberry; perfectly hardy in summer and winter; withstands extreme heat and cold and grows naturally in a very graceful form. 2 yr., 4 ft., \$2.50.

Maple - Acer

Norway. A native of Europe; a large, handsome tree, with broad, deep green, shining foliage. The handsomest and one of the most desirable trees for street, park or lawn. 6-8 ft., \$2.00; 2 in., \$3.50.

Sugar or Rock. A very popular American tree, and for its stately form and fine foliage ranked among the very best, both for lawn and the avenue. 8-10 ft., \$2.00 each.

Silver. A hardy, rapid-growing native tree of large size. Valuable for producing a quick shade. Excellent for street planting. 5-6 ft., 50c; 6-8 ft., 75c; 8-10 ft., \$1.00.

Ash-Leaved (Box Elder). A fine, rapid growing variety; handsome light green foliage and spreading head; very hardy; desirable for street planting and succeeds in many sections where other varieties of Maple will not thrive. 6-8 ft., 50c; 8-10 ft., \$1.00.

Japan (Blood Leaf Maple). Foremost among ornamental stock are the Japanese Maples which, for beauty of coloring, are unsurpassed, and for effective grouping in landscape gardening are invaluable and unrivaled. Strong plants in fine assortment, including varieties with finely cut, blood-red leaves. 18-24 in., \$5.00.

Wier's Cut-Leaved Maple. A beautiful tree of graceful, half drooping habits. Leaves finely cut and luxuriant. One of the best of the ornamental trees. 6-8 ft., \$1.50; 8-10 ft., \$2.50.

Poplar - Populus

Lombardy. Well known for its erect, rapid growth and commanding form; very desirable in large grounds and along roads to break the average height and forms of other trees. 5-6 ft., 50c; 6-8 ft., 75c; 8-10 ft., \$1.00.

Lombardy Poplar.
4 to 5 ft., 40c; 5 to 6 ft., 50c each.

Wisconsin Willow.

Tulip Tree

Liriodendron tulipifera. One of the grandest of our native trees. Of tall, pyramidal habit, with broad, glossy, fiddle-shaped leaves and beautiful tulip-shaped flowers. 4-5 ft., 75c.

Shade for Lily Pool

Salix - The Willows

Salix babylonica (Weeping Willow). The well-known common Weeping Willow; makes a large tree with drooping branches. Very fine for planting on the margin of streams and ponds. 6-8 ft., \$1.50.

Vitellina (Yellow Barked Willow). Erect in growth. Bark very yellow or golden color. 6-8 ft., \$2.00.

Wisconsin (Wisconsin Willow). A large tree with long, drooping branches, similar to Babylonica, but much hardier. Best of all weeping trees for yard and pool. 4-5 ft., 50c; 5-6 ft., 75c.

Cut-Leaf Weeping Birch.
The Most Graceful and Beautiful Tree in America for
Lawn Effects.
Special, 5 to 6 ft., \$1.50 each.

Shade Trees for Beauty and Shade

Ash - Fraxinus

European Mountain. A fine, hardy tree; heads dense and regular, covered from July until winter with clusters of bright red berries. 4-5 ft., 50c; 6-8 ft., \$1.00; 8-10 ft., \$1.50.

Betula - The Birches

Alba (European White Birch). A graceful tree with silvery bark and slender branches. Very effective when grouped with evergreens. 5-6 ft., \$1.00.

Alba laciniata pendula (Weeping Cut-Leaved White Birch). Undoubtedly one of the most popular of all weeping trees; tall and slender, graceful drooping branches, silvery white bark, delicately cut foliage. A well known favorite of great beauty. 5-6 ft., \$1.50; 6-8 ft., \$3.00.

The Catalpas

Bungei (Chinese Catalpa). Umbrella-like head only three or four feet high and twice as broad, forming a pretty dome-shaped head of great, soft, leathery leaves. It is very desirable when grafted on stems five to six feet high for border along drive, walk, or around a park where you do not desire tall trees. 2-yr., \$1.00; 3-yr., \$1.50.

Speciosa (Western Catalpa). Very hardy. Rapid grower. White flowers in late spring. 5-6 ft., 50c; 6-8 ft., \$1.00; 8-10 ft., \$1.50.

Cercis - Judas Tree or Redbud

A medium-sized tree with large, irregular head. Profusion of reddish pink blossoms in early spring before foliage appears; one of the finest ornamental trees. 5-6 ft., \$1.00; 6-8 ft., \$2.50.

Elm - Ulmus

American. A noble native tree of large size, wide-spreading head and graceful, drooping branches. One of the grandest park and street trees. 5-6 ft., 75c; 6-8 ft., \$1.00; 8-10 ft., \$1.50; 2-inch, \$3.00, each.

Catalpa Bungei.
2-yr. head, 5-ft. stem, \$1.00.

Krider Nursery Co.,
Middlebury, Ind.

Hamilton, Ohio.

April 5, 1921.

Sirs:—This letter to inform you that I received the trees and shrubbery in good condition and that I am pleased with the stock. All proved fine plants.

Yours,

H. W. BROWN.

Field Grown Hardy Ornamental Shrubs

Hardy Azalea.

Double White. White, with crimson center.

Double Variegated. Pink and white.

Double Red. An excellent striped variety, nicely marked white and rose.

1-yr., 25c; 2-yr., 35c; 3-yr., 50c.

Almond

Double-Flowering. A most desirable early-flowering shrub, with white and pink flowers. 1-yr., 25c; 2-yr., 50c; 3-yr., 75c.

Althea - Rose of Sharon

Unsurpassed by anything in the hardy shrub line for freedom of bloom or range of color. From midsummer until frost, when few other shrubs are in bloom, the Althea is most handsome, with its large camellia-like flowers of the most varied and beautiful shades.

Double Purple.

Double Blue. Deep blue.

Aralia

Pentaphylla. A pretty medium sized shrub. Hold leaves until late in fall. Valuable for screen planting. Flowers inconspicuous. 1-yr., 25c; 2-yr., 50c; 3-yr., 75c.

Spinosa (Hercules Club). A large shrub with stout prickly stems and compound leaves, flowers creamy white in huge panicles sometimes 2 feet long, followed by dark purple berries, giving a tropical appearance to landscape planting. Very good. 4-5 ft., \$1.50; 2-3 ft., 75c.

Azalea Mollis - Hardy Azalea

This is one of the aristocrats of the flower family. The plant is absolutely hardy, grows to a height of 24 inches and is covered with a mass of bloom in orange and yellow colors through the month of May and early June, before the leaves appear. They are one of the most strikingly beautiful shrubs and attract more attention through the month of May than anything that we have on our grounds. They are planted as a border to Rhododendrons and in beds by themselves. We have a large stock of this variety and have cut the price within the reach of all.

12-18 in., B&B, \$1.50; 18-24 in., B&B, \$2.50, f.o.b. Middlebury, Ind.

Buddleia - Butterfly Bush

Veitchi magnifica. A very attractive new addition to the flowering plants. While a perennial in habit, yet because of its vigor and size, it is used largely in shrub plantings. The tops in severe winter will freeze back, but it pushes with such renewed vigor this is not harmful. The flowers are borne on the tips of every bit of new growth, and in August the plants are masses of purple and violet flowers, very conspicuous, that attract butterflies. 18-24 in., 25c; 2-3 ft., 50c.

Berberis - Barberry

Atropurpurea (Red Japanese Barberry). This shrub fills a long felt want. Since Wheat Rust attacked this country and all Purple and Common Barberries had to be cut out, there has been a great demand for a new type that would satisfactorily take the place of the old Purple Barberry. We offer the new Red Japanese and guarantee that if it is placed in a position of plenty of sun it will do as well as the old time Purple. Red Japanese Barberry may be used for the shrubbery border, for clumps, or even as a specimen shrub. The color is a rich bronzy red similar to the best of the Bloodleaf Japan Maples. It is like the Japanese Barberry in all other respects, attaining its beautiful orange and bronze coloring in fall, and bearing the same profusion of bright red berries throughout the winter. 12-15 in., 35c; 18-24 in., 75c. See colored cut opposite.

Red Barberry.

Special, 2-yr., 12-15 in., 25c each; 5 for \$1.00.

BERBERIS—Continued.

Thunbergi (Japanese Barberry). Low, compact growing shrub, much used for border or hedge planting. Can be trimmed for formal planting. Small flowers in May followed by abundance of berries which turn to deep scarlet in winter. The fine green foliage turns to a brilliant red in autumn. Very attractive. 12-18 in., 25c; 18-24 in., 50c; 2-3 ft., 75c.

Calycanthus

The old-fashioned sweet shrub with a rare and peculiar fragrance of wood and flowers, an abundance of chocolate colored flowers in June and at intervals afterward. Foliage rich dark green. 1-yr., 25c; 2-yr., 50c.

Flowering Crabs

Bechtel's Double Flowering Crab. A sturdy grower, hardy and a medium size, flowers large, double, resembling double pink roses; very fragrant when in bloom, looks like mammoth rose; blooms young. 2-3 ft., 75c.

Purple Leaf Crab. This is a comparatively new introduction. We have been

Bechtel's Flowering Crab.

growing it now for six years and we find it is the most popular of flowering trees for a lawn. The Purple Leaf Crab has purple leaves equal to the Purple Leaf Plum and makes a beautiful lawn tree throughout the entire summer. When in bloom in May and June it is a mass of pink flowers like the illustration, flowers so thick that the leaves can hardly be seen. It is getting to be more popular than the Magnolia tree. We have a large stock of Crab, beautiful straight trees, 3 to 4 feet, well branched, ready to bloom and we are putting an unheard of price of 50c each, postpaid, on these while they last.

Flowering Crab, Purple Leaf.

Red-Flowering Crab (*Malus Eleyi*). This is another new creation in the Flowering Crabs. It has green leaves, is an upright grower and when in flower is one mass of bloom, through May and June, with red flowers; extra special. It is our desire to see these beautiful Flowering Crabs on the lawns of all our customers and if you will send us the names and addresses of five of your neighbors who are interested in fruit and flowers, that is, buyers of nursery stock, we will send you two of these Flowering Crabs, one of the red-flowering and one of the pink-flowering, for 50c.

Cydonia

Japonica (Japan Quince). Brilliant flowering shrub covered with scarlet flowers early in the spring. Good for massing. 1-yr., 15c; 2-yr., 35c; 3-yr., 50c.

Cydonia Japonica.

Cornus - Dogwood or Osier

This group of shrubs is adapted for use in border and screen plantings. Attractive flowers. Abundance of berries and highly colored foliage in autumn. The twigs are a bright color in winter time.

Elegantissima variegata (Variegated Dogwood). Fine variegated shrub, leaves broadly margined with white. 1-yr., 25c; 2-yr., 50c.

Paniculata (Gray Dogwood). A very useful variety for screening purposes. Flowers white, fruit white on bright red stems. 1-yr., 25c; 2-yr., 50c.

Sibirica (Red-Twigged Dogwood). With small clusters of white flowers, its blue berries and its dark red bark, this is one of the most attractive shrubs. 1-yr., 25c; 2-yr., 50c.

Stolonifera var. aurea (Golden Barked Osier). Bright yellow twigs. Makes an attractive combination with Red-Twigged Dogwood. 1-yr., 25c; 2-yr., 50c; 3-yr., 75c.

Deutzia

One of the finest of shrubs for abundance of pretty blossoms which cover the plants in early spring. Can be used in borders, mass or specimen planting. Very good.

Crenata flore pleno. Flowers double, white, tinged with rose, blooming in late June. Very hardy. 1-yr., 15c; 2-yr., 25c; 3-yr., 50c.

Gracilis. This is the finest of dwarf shrubs with white flowers. A semi-circle in front of basement windows is a beautiful sight. 18 inches is extreme height. 12-18 in., blooming size, 25c each; 5 for \$1.00. It takes five of these for a window planting. Nothing prettier.

Lemoinei. Flowers pure white; shrub medium and free-flowering. Excellent for forcing. 1-yr., 15c; 2-yr., 25c; 3-yr., 50c.

Pride of Rochester. Produces large, double, white flowers tinged with rose. Profuse bloomer. One of the best. Flowers early. 1-yr., 15c; 2-yr., 25c; 3-yr., 50c.

Elaeagnus

Angustifolia (Russian Olive). Is a fine shrub for border and background work. Grows 10 feet high and its beautiful silvery foliage towering above other shrubs is strikingly beautiful. 2-3 ft., 25c; 3-4 ft., 35c.

Elder - Sambucus

Golden (*Sambucus nigra aurea*). A handsome shrub with golden yellow foliage and clusters of pure white flowers. Excellent for lawn planting. 1-yr., 25c; 2-yr., 50c; 3-yr., 75c.

Euonymus

Alatus. Most beautiful shrub for entrance planting. Its cork bark and beautiful red berries attract attention everywhere. Plant one on each side of front entrance and you will have something worth while. 12-18 in., 25c; 2-3 ft. specimens, 75c; 2 for \$1.25.

Hydrangea Paniculata Grandiflora.

Hydrangea Arborescens.

Exochorda

Grandiflora (Pearl Bush). It grows vigorously to a height of 6 to 10 feet. The early buds like pearls strung on slender threads, May opening them up to long, gleaming sprays of pure white. 2-yr., 50c.

Forsythia - Golden Bell

These splendid old shrubs growing 8 to 10 feet tall eventually, light up the garden with glinting masses of yellow, very early in spring before leaves appear. The upright form make excellent tall hedges, and are bright hued fillers for massed shrub groups.

Intermedia. The earliest blooming. 1-yr., 15c; 2-yr., 25c; 3-yr., 50c.

Viridissima. Twisted flowers. Not dependable for hardiness in northern latitudes. 1-yr., 15c; 2-yr., 25c; 3-yr., 50c.

Fortunei. The most upright in growth. 1-yr., 15c; 2-yr., 25c; 3-yr., 50c.

Hydrangea

Arborescens (Snowball Hydrangea). Has the appearance of a low-growing snowball with its large clusters of white flowers. Particularly desirable on account of coming into bloom before the Hydrangea paniculata. Its blooming period is from early June until middle of August. A very desirable shrub. 1-yr., 25c; 2-yr., 50c; 3-yr., 75c.

HYDRANGEA—Continued.

Paniculata grandiflora. One of the most popular shrubs in cultivation, blooming at a time when few shrubs are in bloom. Flowers borne in huge panicles from 8 to 12 inches long, delicate pink changing to brown. Very desirable. 1-yr., 25c; 2-yr., 35c; 3-yr., 50c.

Tree Hydrangea. This is the *Paniculata Grandiflora* with all its beauty of great clusters of blooms in tree shape. Will grow 6 to 8 feet high. 2-3 ft., 75c; 3-4 ft., \$1.00.

Hamamelis

Virginiana (Witch Hazel). Has a wealth of delicate yellow flowers appearing in late fall. Exceptionally beautiful at the edge of a wood or along woodland paths. 1-yr., 15c; 2-yr., 35c.

Honeysuckle - Lonicera

Vigorous tall growing shrubs, invaluable for screening and massing effects.

Tatarica rubra. Valuable shrub for tall hedge and for a specimen at the corner of the home. If clumps of *Arguta Spirea* are planted around this in a circle it makes the most beautiful planting you can desire. Imagine the bright red berries of the Honeysuckle through the lacy foliage of the *Arguta Spirea*. 2-3 ft., 25c each; 3-4 ft., 50c; 1 bush Honeysuckle and 5 clumps of *Arguta Spirea*, complete corner planting, 6 shrubs, 2-3 ft., for \$1.25; 6 shrubs, 3-4 ft., for \$2.50. Immediate effect.

Kerria - Corchorus; Globe Flower

An attractive shrub with slender green branches and showy yellow flowers. It thrives in almost any well drained soil. Hardy, but benefited by protection from cold winds in severe climates.

Japonica. A slender green-branched shrub covered with single yellow flowers from July to October. 1-yr., 25c; 2-yr., 50c.

French Lilacs

For the first time in ten years we are able to offer our trade ten varieties of French Lilacs. The French Lilacs are grafted stock, they never sucker up on the lawn; become specimen trees, the flowers of which are more beautiful than any of the Lilac family. Our stock of these is two years old, transplanted specimens running 18 to 24 inches and 2 to 3 feet high, depending on the variety.

While the supply lasts we are offering these to our customers, postpaid, at 50c each; the entire collection of 10 for \$1.00, prepaid. This collection includes the following new and well known varieties:

Berryer. Semi-double; clear mauve. New.

Chas. X. Single red; large trusses; beautiful.

Claude Bernard. Semi-double; bright lilac. New.

Hugo Koster. Single; lilac with reddish tint. New.

Jan Van Tol. Single; pure white; very large trusses and extremely large, individual flowers; it is a very good grower and flowers freely. New.

Ludwig Spaeth. Single; purple; large trusses.

Marie Legraye. Pure white; single; immense clusters.

Michael Buchner. Double; pale lilac. New.

President Grevy. Large trusses of double red flowers.

Vauban. Double; tender mauve. New.

Persian Lilacs

Persian Lilac. The finest of the Lilac family. Grows 4-5 feet tall and covered with masses of reddish purple bloom more delicate than the common varieties and much more fragrant. Be sure and add these to your home grounds. 18-24 in., 25c; 2 to 3 ft., 50c.

Villosa. Late blooming Lilac. Flowers large, light purple in bud, white when open; fragrant. Does not grow high. Height 5 to 8 feet. 2-3 ft., 50c.

Old Fashioned Lilacs

Purple Lilac (S. vulgaris). The well known purple variety; always a standard sort. 2-3 ft., 25c; 10 for \$2.00.

White Lilac (S. vulgaris alba). Too well known to need description; flowers white and fragrant. 2-3 ft., 25c; 10 for \$2.00.

1-yr. shrubs run 18-24 in., 2 to 3 canes

2-yr. shrubs run 2-3 ft., 5 to 7 canes

3-yr. shrubs run 3-4 ft., 8 to 15 canes

French Lilac.

Honeysuckle Tatarica Rubra.

Philadelphus

(Mock Orange or Syringa)

This old-fashioned shrub with creamy white flowers borne in clusters is found in many plantings. There are many varieties that offer a wide range of size and blooms. All varieties are strong growers and are suitable for border, screen or specimen planting. We have a few new varieties that are exceptionally fine and you will be highly pleased with them. 1 yr., 25c; 2 yr., 50c; 3 yr., 75c.

Coronarius (Mock Orange).

A tall, vigorous bush. Fragrant white flowers in May, resembling orange blossoms. Abundant dark green foliage. Does well in shady places. Fine for cutting. Price, 3-yr. strong bushes, 35c each; 3 for \$1.00.

Virginal. Blooms throughout the season. This

is a new and wonderful addition to the Mock Orange family but is far beyond anything in this line that has been brought out in the past. It is without question one of the most beautiful shrubs and once it becomes known will be planted on every home ground. Because of its being new the supply of this variety is scarce and high priced, but

Rose Tree of China.

we are going to offer these at the following low prices as long as our supply of this shrub lasts. Price, 18-24 in., 35c each; 10 for \$3.00. Large, 2-3 ft. plants, 50c each; 10 for \$4.00.

Philadelphus, Virginal.

Purple-Leaved Plum

Prunus Pissardi. This is the finest purple-leaved tree or shrub. In the spring the leaves are crimson, changing to dark purple as the season advances. This splendid color is maintained until the leaves drop in the fall. 3-4 ft., 50c each.

Rhus - Smoke Tree

Purple Fringe. A bush 10 ft. high with simple obovate leaves and brown bark; flowers purple in loose panicles and on long pedicels, which become profusely plumose, giving the plant a smoky appearance from which it derives its common name. Early summer. There is nothing quite like it and it should be planted on every lawn. Price, 12-18 in., 50c each.

Rose Tree of China

Prunus triloba. A new and distinct shrub, blooms in May. Solid mass of pink rose-shaped flowers. Planted on the lawn there is nothing more beautiful. Be sure and order one of these. 2-3 ft., 75c each; 3 for \$2.00.

Purple-Leaved Plum.

NOTE.—We sell

10 of any 15c shrubs for \$1.25
10 of any 25c shrubs for 2.00
10 of any 50c shrubs for 4.00

Unusual Evergreens and Shrubs

Rhododendron Catawbiense.

Rhododendrons

Those of you who have noticed the plantings in Cleveland and other cities in the North and East during the past five or six years will have noticed the large number of homes landscaped with Rhododendrons and Azaleas. These beautiful broad-leaved evergreens need no lengthy description. The exquisite beauty of the plant and the delicate shading of the masses of orchid-like blossoms, big as Peonies, appeal to everyone.

Directions for planting and growing furnished free.

Catawbiense (Catawba Rhododendron). One of the most beautiful native shrubs and the hardiest of all the Rhododendrons. In June every branch has a large cluster of 4- to 6-inch broad, rosy purple blooms. The foliage is the most handsome of any Rhododendrons. This, like the following species, is now used extensively in park planting and taken by carloads from native woods and mountains. Dug with care, with a ball of turfy soil, it may be successfully transplanted. The handsome large evergreen foliage is pleasant to behold the year around. Guaranteed nursery grown. Clumps, 12-18 in., \$2.50 each; 10 for \$20.00.

Weigela Floribunda

Of all shrubs of late creation, the ever-blooming red *Weigela floribunda* surpasses everything in a red-flowered shrub. Much harder than *Eva Rathke* and a better red flower. The flowers commence blooming early in the spring and bloom profusely all summer long. The leaves are a glossy green and when the shrub is three years old the flowers are in such profuse clusters as to completely hide the leaves. Every customer should find a place for one to three of these beautiful shrubs in their border plantings. They are grafted and never sucker up and we have 5,000 two-year-old transplanted shrubs to offer our trade this spring at a price in line with the cheaper flowering *Weigela*. 2-yr., 18-24 in., 50c each; 3 for \$1.00, postpaid.

Weigela Floribunda.
Everblooming Red-Flowered Weigela.

Kolkwitzia Amabilis
(Beauty Bush).

Kolkwitzia Amabilis

A charming new shrub that attains a height of six feet, the center being upright and the branches arching gracefully to the side. In June it is covered with bell-shaped flowers of a pale pink shade with orange veins in the throat. It adds beauty to any garden. 2-yr., 18-24 in., 50c; 3 for \$1.00, postpaid.

Spirea Van Houttei.
18-24 in., 15c each; \$1.00 per doz., postpaid.

Korean Spirea. (New). This is the new addition to the Spirea family and bids fair to become the most popular. It is more beautiful than the Spirea Van Houtte and blooms about two weeks later. The Korean Spirea is covered with a mass of blooms of white that completely hide the branches and obscure the foliage. It is a June blooming shrub and is one of the best of its class. We have an immense stock in this variety of shrub in 2-yr., 18-24 in., and we are offering them at the price of the others. 50c each; 3 for \$1.00.

Froebel Spirea (S. Froebeli). Of the Anthony Waterer type but more sturdy in habit. Canes distinctly reddish; young foliage tinged red; flowers rose color. Brilliantly colored in autumn. 12-18 in., 25c; 18-24 in., 35c.

Opulifolia (Ninebark). Grows upright, attaining 8 to 10 feet. Bears white flowers in June. Old flower heads turn to a dark red and make a striking variety of colors at different stages of maturity. 2-3 ft., 25c; 3-4 ft., 50c.

Opulifolia, var. aurea. 6 to 8 feet. Very much like the former, except that the foliage is yellow in spring, changing to golden bronze in autumn. 1-yr., 35c; 2-yr., 50c.

White Snowberry.
18-24 in., 15c each; \$1.00 per doz., postpaid.

Spirea

An indispensable class of small to medium size shrubs. Unsurpassed in beauty. Easy of culture and very hardy. Very satisfactory for single or clumping effect and planted more largely than any other flowering shrubs. The blooming period of the different sorts extends from May until September.

Arguta. 4 to 5 feet. Of dwarf, slender, graceful habit; foliage fine, light green; blossoms very early, last of April or first of May. 1-yr., 25c; 2-yr., 50c.

Anthony Waterer. 2 to 3 feet. An improved variety of this type; dwarf, upright grower, covered from June or July until fall with large heads of dark crimson flowers. Darker than Bumalda. A valuable addition to the list. 1-yr., 20c; 2-yr., 35c; 3-yr., 50c.

Billardi. 4 to 6 feet. Medium sized, upright grower with spikes of rose colored flowers in July. 2-3 ft., 50c.

Billardi alba. Similar in foliage to Billardi except it has a white blossom. Hardy. 1-yr., 25c; 2-yr., 50c; 3-yr., 60c.

Bumalda. A handsome variety from Japan. Dwarf in habit and of vigorous growth. Foliage narrow; flowers rose colored and borne in great profusion, lasting a long time. 1-yr., 35c; 2-yr., 50c; 3-yr., 75c.

Spirea Arguta.
18-24 in., 15c each; \$1.00 per doz., postpaid.

Prunifolia fl. pl. (Bridal Wreath). 4 to 5 feet. A fine variety with plumlike leaves. The branches are covered in May with small, double white flowers. Is in bloom for some time. 2-3 ft., 50c; 3-4 ft., 75c.

Thunbergi. Forms a dense, feathery bush, 3 to 4 feet high. Foliage changes to bright scarlet shades in autumn. 18-24 in., 25c; 2-3 ft., 50c.

Van Houttei. This is undoubtedly the most charming and beautiful of all the varieties having pure white flowers in clusters, the branches drooping to the ground. Foliage a rich green. Very profuse in bloom and plants remarkably hardy. The variety most commonly planted. Commonly called Bridal Wreath. 18-24 in., 15c; 12 for \$1.00. 2-3 ft., 25c; 12 for \$2.00. 3-4 ft., 35c; 12 for \$3.00, postpaid.

Snowberry - Symphoricarpos

These are especially valuable for planting in the shade and in undergrowth.

Racemosus (Snowberry). 3 to 4 feet. Flowers small, pink, in June or July; foliage dark green; berries large, white, and hang well into winter. 2-3 ft., 25c; 3-4 ft., 35c.

Vulgaris (Indian Currant, Coralberry). 3 to 4 feet. Similar to Snowberry, except berries are smaller and are red. 2-3 ft., 25c; 3-4 ft., 35c.

Dear Sir:
I bought a bill of trees, etc., about ten years ago from you and was more than satisfied, and now I bought another place and am in need of more, so will you please send me a catalog.
Respectfully,
G. U. APPLEMAN,
608 W. Green St.
Piqua, Ohio.
Feb. 4, 1931.

Tamarix

Shrubs of strong but slender delicate growth similar to the asparagus. Their pink flowers, filmy foliage and gracefulness make them one of the most desirable shrubs for background or interplanting. Will grow in poor, dry soil where other shrubs fail.

Aestivalis. 6 to 7 feet. Pink June. This species has bluish gray foliage, carmine-pink flowers, and also blooms late in the summer. 2-3 ft., 35c.

Africana. 7 to 10 feet. Deep pink. April and May. This is the most vigorous of any. Sea green foliage and pink flowers; blooms early. 2-3 ft., 35c.

Viburnum - Snowball

In this group are some of the most conspicuous shrubs for blossoms, berries or autumnal foliage we have. They are all hardy, vigorous and healthy. For individual specimens or shrubby borders they are desirable. Most of them will grow in partial shade but do better in the sun.

Dentatum. Has glossy green foliage, white flowers in June; crimson berries turning blue in autumn. One of the best shrubs for landscape planting. 2-3 ft., 50c; 3-4 ft., 75c.

Viburnum Carlesii.

Lentago (Sheepberry). Grows 20 to 30 feet high, white flowers in cymes in May and June. Large oval blue-black fruit in autumn. 2-3 ft., 50c; 3-4 ft., 75c.

Lantana (Wayfaring Tree). 10 to 12 feet. White. June. A large, vigorous shrub with soft, heavy lantana-like leaves and large clusters of white flowers in May, succeeded by red berries which turn black as they ripen. 2-3 ft., 50c; 3-4 ft., 75c.

Opulus (High Bush Cranberry). 8 to 10 feet. White. May. Strong, rather spreading habit with single white flowers borne in flat clusters. The very showy red fruit which follows and the beautiful coloring in the fall go to make it one of the best. 2-3 ft., 35c; 3-4 ft., 50c.

Carlesii. The new Pink Snowball. Very fragrant. The greatest of all Snowballs. New. 18-24 in., 2-yr., \$1.00 each.

Plicatum (Japanese Snowball). 6 to 8 feet. White. May. This species is one of the most satisfactory shrubs grown. Its pure white, double blossoms with a setting of dark pleated leaves and perfect form make it one of the best. Fine for an individual specimen or in groups. 2-3 ft., 50c.

Sterile (Old-Fashioned Snowball). 10 to 12 feet. White. May. This old-fashioned variety is well known to every lover of plants. Its balls of pure white literally cover the bush when in bloom. 2-3 ft., 50c.

Weigela Rosea.
Pink and White—Blossoms in June.
18-24 in., 25c each, postpaid.

Weigela - Diervilla

The Weigelas are shrubs of erect habit while young, but gradually spread and droop as they acquire age; flowers are large, trumpet-shaped, of all shades and colors; very effective for grouping and borders; blossoms are produced in June and July.

Candida. Flowers pure white produced in June and continue to bloom nearly all summer. 2-3 ft., 50c.

Eva Rathke. Flowers a brilliant crimson; a beautiful clear, distinct shade. 2-3 ft., 50c.

Rosea. An elegant variety with fine rose colored flowers appearing in June. 2-3 ft., 35c.

Variegated (Nana variegata). This is perhaps second to no other hard-wooded plant with variously colored leaves. It stands the sun well and retains its well marked tints until autumn. The flowers are lighter in color than the Rosea, but it is equally as free in bloom. 18-24 in., 35c; 2-3 ft., 50c.

Tamarix Africana.
18-24 in., 25c each, postpaid.

Prices are on No. 1 Field Grown Stock **Krider's Hardy**

Los Angeles.

Los Angeles. One of the most beautiful Roses yet introduced. The long-stemmed flowers are of a luminous flame-pink, toned with coral, and shaded with translucent gold at the base of the petals. The buds are long and pointed and expand to flowers of large proportion, of absolutely perfect form and of rich fragrance. 75c each.

Premier. The blooms are immense, buds long, full, pointed. Color rich deep rose-pink, without shadings. Flowers of pleasing fragrance are borne singly on stiff, almost thornless stems with very fine disease resistant foliage. \$1.00 each.

Premier.

The Krider Nurseries, Middlebury, Indiana.

Gentlemen: May 6, 1931.

The roses I ordered from you only last Friday arrived today and I wish to take this opportunity to express my sincerest thanks for the promptness with which you handled my small order and for the excellent condition in which it arrived. Never before have I seen healthier looking plants. They were packed extraordinarily well and were delivered to me as if they had just been handed over a counter instead of traveling some 800 miles.

I cannot wish you enough good luck for the future.

Yours very truly,

RICHARD BATES.

Armada, Mich.
Jan. 21, 1931.
Krider Nurseries.

Dear Sir:

I was greatly pleased with the large rose bushes sent me last fall; they are wonderful for the price you ask for them.

MRS. W. C. GERCHOW, Jr.

Collection No. 2

Rev. F. Page-Roberts. A Rose of remarkable beauty both in form and color. The long pointed buds are of a coppery red stained red on the outside and open to good, full double, fragrant flowers of a golden yellow, particularly high colored in late summer and fall. The plant is of vigorous branching habit with beautiful foliage. \$1.00 each.

Rev. F. Page-Roberts.

E. G. Hill.

E. G. Hill. Here is the finest new red Rose in several years, with immense flowers of very lasting, dazzling scarlet, never fading or turning blue, but actually becoming deeper red as it opens. The flowers are borne on long stems and are deliciously fragrant. The foliage is abundant. There are few of the older red Roses which will rival E. G. Hill, for it is truly a magnificent red Rose. \$1.00 each.

Kaiserin Augusta Victoria.

Kaiserin Augusta Victoria.

A great white, hardy, everblooming Rose. Strong sturdy grower; free flowering; has become the most popular of all white Roses for general planting. Blooms continuously from early spring until late fall; long, pointed buds, large, double flowers, glorious in their perfection; borne on long, stiff stems; deliciously fragrant; very hardy. 75c each.

Sunburst (Giant Yellow).

Immense buds, long and pointed on strong, stout stems opening into beautiful gigantic, full, deep, double flowers, which are borne continuously. Color coppery yellow, with golden orange in deeper shades. Magnificent bush Rose, stands four feet or more in height. Foliage immense in size and strong, vigorous in habit of growth. Superb. 75c each.

Sunburst.

Northern Grown Roses

Collection No 3

Prices on No. 1, field-grown, 2-year stock.

Souv. de Claudius Pernet.

Souv. de Claudius Pernet. Since its introduction from Europe, this has become possibly the most famous of yellow Roses and its popularity has not dimmed. A vigorous, erect grower with extremely beautiful bright green foliage and few thorns, producing many exquisite buds on long, stiff stems. **\$1.00 each.**

Talisman.

Etoile de Hollande.

Etoile de Hollande. Brilliant red blooms of magnificent size, perfect in bud, half open or fully developed flower. The flowers always open cleanly and do not fade. A strong, free branching plant. The demand has steadily grown for it. **\$1.00 each.**

Talisman. The most sensational Rose of all times, and has been awarded more Gold Medals than any other American production. Its brilliant orange-red buds, long and beautifully formed, open to a large, fragrant, double bloom of glowing golden yellow, stained with copper-red and orange-yellow on the inside. Its colorings are magnificent, and it arouses the greatest admiration everywhere. The plant is healthy, vigorous and hardy, with glossy green foliage. 2-yr., field-grown, **\$1.25 each.**

Hardy Climbing Roses

These are the Roses so necessary for the home, giving it, no matter how humble or pretentious, a touch of beauty not to be had by any other form of adornment. They also have a most useful side, in that they give most delightful and refreshing shade when used on the porch, veranda or pergola. They are used very extensively in covering unsightly spots in the grounds, for screening outbuildings. Are especially recommended for trailing down over embankments and for cemetery planting; not subject to insect attack. All are hardy everywhere.

Price of Climbing Roses, all varieties, 2 yr., 25c; 5 for \$1.00.

Climbing American Beauty. Flowers of large size, good form, of rich, red color passing to crimson. Very fragrant. Good foliage and absolutely hardy.

Dorothy Perkins. Beautiful shell-pink, which holds for a long time, shading to a lovely deep rose. Very

Climbing American Beauty.
25c each; 5 for \$1.00, postpaid.

sweetly scented, hardy and a strong grower.

Dr. W. Van Fleet. This new Rose has a great future. In flower and foliage it is all that could be expected of a climbing Rose. Blossoms extra large resembling the tender Hybrid Tea Roses in shape and size. Its strong stems are 12 to 18 inches long, making it valuable for cutting. In color a delicate flesh-pink changing when full blown to a flesh-white shade.

Excelsa or Red Dorothy Perkins. Intense crimson-scarlet. Double flowers in brilliant clusters set in glossy green foliage. Extremely vigorous and one of the handsomest of all climbers.

Paul's Scarlet Climber. An entirely new variety, combining vigorous growth, wonderful foliage and absolute hardness, together with flowers almost as large as those produced on bush Roses; in color a brilliant scarlet which lasts well.

Flower of Fairfield (Everblooming Crimson Rambler). Brilliant crimson. Flowers almost continually in brilliant clusters from early summer until frost.

Crimson Rambler. One of the most popular of the climbers. A rapid grower and perfectly hardy; flowers in rich clusters of vivid crimson. One year plants will attain a height of 10 to 20 feet in a single season and the second year they will produce a marvelous profusion of their rich glowing crimson flowers.

Tausendschon (Thousand Beauties). Varying in shade from a delicate flushed white to a deep pink or reddish crimson, in bright clusters, almost covering the handsome green foliage. A climbing Rose that comes to us from Germany. It gets its name from its many flowers and from their variation in coloring.

White Dorothy Perkins. A pure white sport from Dorothy Perkins, with which it is identical in variety and habits. A valuable addition to the hardy climbing class. The plant is a strong rampant grower, covering a large porch or trellis in a remarkably short time.

Dr. W. Van Fleet. 25c each.

Dyersburg, Tenn.

The Krider Nurseries,

Middlebury, Ind.

Gentlemen:

Your reply to my letter and also catalog received. Will say that after seeing roses that I got from you bloom, my friends and acquaintances here so admired them that I secured many nice orders of roses and bulbs for you and feel sure that I can get still more without any effort. I only lost one rose out of the dozen I got from you last fall.

Sincerely yours,

MISS NAOMI HARWOOD.

Baby Ramblers and Polyantha Roses

A type of Rose which is very popular for bedding purposes. They form shapely, compact, bushy specimens about 18 inches high, producing a great profusion from early in the season, until severe frost, immense trusses of small flowers. Pruning is not necessary; simply remove the past season's flower stems. 2-yr.-old plants, 35c each; 3 for \$1.00.

Baby Tausendschon. 35c each.

Baby Rambler. We have Baby Rambler, daddy of them all. It is in bloom all the time, flowers in large clusters of brightest crimson. It grows to a height of eighteen inches and hides the plant with its bloom. A most wonderful Rose.

Baby Tausendschon. We have nothing lovelier in Roses than this Dwarf Polyantha with its beautiful bouquets of creamy white, saucer-shaped flowers, every petal edged with lovely rosy pink.

Catherine Zeimet. This is the new White Baby Rambler. A continuous blooming Rose of great merit. Fine for bedding.

Erna Teschendorff. The much heralded variety from Holland. Color, brilliant dark carmine-red, and is darker than Red Baby Rambler. Very free-flowering.

F. J. Grootendorst. 35c each

F. J. Grootendorst. A cross between Rosa Rugosa and Baby Rambler, retaining all the vigor, hardiness, and healthy foliage of the Rugosa. Fine red blooms. The only hardy and everblooming hedging or massing Rose, and for these purposes it is ideal. Each, 35c; 3 for \$1.00.

Conrad Ferdinand Meyer. Strong grower, perfectly hardy. Flowers silvery rose, large, well filled, very fragrant. 2 yr., 35c each; 3 for \$1.00.

Eskimo Beauties

Each, 35c; 3 for \$1.00.

The Roses that grow where no others will. Hybrid Rugosa Roses in which are combined the best qualities of the different rose species.

Belle Poitevine (An Eskimo Beauty). The blooms are large and full, the petals gracefully incurved. Bright, clear, lively pink.

Sir Thomas Lipton (An Eskimo Beauty). Pure white; no tinge of pink or yellow—just pure white. The flowers are very double and borne in graceful clusters.

Hansa (An Eskimo Beauty). Handsome in bud and bloom. Both are large, very full and double. The color is rich, maroon-red.

SPECIAL

Hugonis (The Golden Rose of China). Blooms three weeks earlier than most other Roses. Hugonis has proved hardy everywhere in the United States, a shrub-rose of countless uses—splendid for specimens, popular in shrubbery plantings, handsome for hedges. Still more in its favor, it's beautiful!—great golden hollyhock-like flowers of clear yellow on maroon-colored canes in May. Such a dazzling display in front of your place. Each, 2 yr., 50c; 3 for \$1.00.

Hugonis, Golden Rose of China.

RED RADIANCE
Very showy, fragrant, wonderful bloomer, bright cerise-red, handsome foliage. 50c each; 3 for \$1.00.

MRS. AARON WARD
Long buds, golden orange, fragrant flowers shading to creamy yellow. 50c each; 3 for \$1.00.

GRUSS AN TEPLITZ
Erect, bushy plants with clusters of scarlet blooms; fragrant; always in bloom. 50c each; 3 for \$1.00.

PINK RADIANCE
Blooms from spring until late fall; brilliant rose-pink, deeper on outside; long stems. 65c each; 3 for \$1.75; 6 for \$3.25.

DBL. WHITE KILLARNEY
Buds long, pointed; very large, white blooms, fragrant. Best white. 65c each; 3 for \$1.75; 6 for \$3.25.

MRS. JOHN LAING
Shade of rose-pink; delightfully fragrant; free bloomer. Fine for bouquets. 50c each; 3 for \$1.00.

Collection No. 4

Extra Special Rose Offer

We offer the above six Roses in two-year, No. 1, field-grown stock, postpaid, for **\$1.69**

Or we offer any combination of above six Roses, postpaid for \$1.69; two of a kind and 3 kinds or vice versa; or if preferred, the following well known Roses may be substituted for any of the above to make up a collection of six for \$1.69.

GENERAL JACQUEMINOT and

J. L. MOCK. Both Roses too well known to need description.

MADAME EDOUARD HERRIOT. An everblooming red Rose.

MRS. CHAS. BELL. The new salmon Radiance.

LUXEMBOURG. One of the hardiest yellow Roses grown.

PAUL NEYRON. The largest pink blooming Rose grown today.

NOTE: All of our Roses are grafted on Multiflora or budded on disbudded Rugosa, which process makes the hardiest, longest-lived and best Roses that can be produced. It costs more to raise Roses in this manner, but it makes better satisfied customers. Rambler Roses on their own roots give satisfaction, but Hybrid Teas on their own roots will not stand the northern winters. The Los Angeles, grafted on Multiflora, will stand a temperature of 20 degrees below zero, as will also Talisman, President Herbert Hoover, and all of the newer varieties. Grown on their own roots they are obliterated in a temperature of 5 degrees below zero. A Rose budded on disbudded Rugosas or grafted on Multiflora will never sucker up, giving the customer a wild bush that soon kills off the better Rose as was the case with Roses budded on Manetta.

We guarantee our Roses to be as well grown and to give you as good satisfaction as any you can obtain anywhere, no matter what you pay and if grown side by side will produce as fine Roses as any bushes which you have paid from \$1.00 to \$5.00 each to obtain.

Indianapolis, Ind., June 20, 1931.

Dear Sirs:

We received one dozen of your Hybrid Tea Roses this spring which we added to our rose garden. We have 46 bushes in one double row. My husband is a Rose man and a lover of Roses. We are growing our Roses according to the Rose manual and they certainly are wonderful. Now what pleases us with the Krider Roses is that they are equal to the most expensive ones that we have in our garden.

We have a yard beautification contest here in Indianapolis every year. I have entered the last two years and have won a prize both times. There are so many people coming all the time and the first thing they look at are the Roses. Of course, they all want to know the different kinds and where we bought them. Of course we boost the Krider Roses because they cost about one-third of what the rest of them did.

Now if you are interested and would like to send me some catalogs I would hand them out to the Rose lovers. I have promised several to get them a catalog. We are so enthused over your Roses that I believe we could sell them ourselves.

Yours truly,

MRS. FRANK MOPPERT,
3221 W. 10th St.

WILLOWMERE
(Tea). Coral-red color suffused with carmine in the bud state and opens to a large, full, handsome flower of a rich shrimp-pink, shaded yellow in the center and flushed carmine-pink towards the edges of the petals. 75c each.

MISS ROWENA THOM
(Tea). Its large, ovoid buds are long and shapely, opening to perfect double, fragrant flowers, frequently 5 inches across, of a brilliant dark rose-pink with a golden glow at the base of the petals that suffuses the entire flower and intensifies the color as the blooms unfold. 75c each.

ANTOINE RIVOIRE OR MRS. TAFT
Creamy white delicately tinted with pink; extra large petals, making a bloom of decidedly distinct and beautiful form; full and double. 75c each.

WILHELM KORDES
(Tea). Bud large, long-pointed; flower large, double, full, high centered, very lasting; golden yellow, with coppery yellow at edges and on petals exposed to the sun; borne singly on long, strong stems; strong fragrance, like ripe apples. Foliage sufficient, medium size, leathery, glossy, disease resistant. Vigorous, upright, bushy; abundant and continuous bloomer. 75c each.

MARGARET MCGREDY
(Tea). Large, beautifully shaped, full double flowers, entirely distinct from all others in its rich coloring, which is a brilliant shade of Turkish or Oriental red, passing as the flowers age to a beautiful carmine-rose. These are borne on long, stiff stems and hold their form and beauty for a long time. 75c each.

LADY MARGARET STEWART
(Tea). We quote introducer's description verbatim: "A Rose of most unique and distinct color and very difficult to portray. In the young stage the flower is deep sunflower yellow heavily veined and splashed with orange-scarlet. 75c each.

Collection No. 5.

Extra Special Rose Offer

Above 6 Roses 2-YEAR, FIELD-GROWN, VALUE \$4.50, POSTPAID FOR \$2.48

The Six Finest Roses in the World

\$6.00 Value (See Front Cover) for \$2.98

2-yr., field-grown. Grafted on Multiflora.

President Herbert Hoover. A happy blend of orange and pink, varying in tone from coppery red in the bud, to glowing orange-yellow at the base of the petals, flamed and suffused with vivid rose-pink. In all stages of bloom, from bud to fully opened flower, it is unusually attractive. Gold Medal at International Flower Show. \$1.00 each.

Templar. Bud medium size, globular; flower medium size, double, globular, very lasting. Vigorous, upright, abundant, and continuous bloomer. A new forcing Rose which is making its way into the garden. Clear bright red, of exceedingly double form and with fine strong stems. Few thorns. New in 1924, and needs testing in the garden. Strongly perfumed. \$1.00 each.

The Krider Nurseries, Goshen, Ind.,
Middlebury, Ind. October 1, 1931.

Dear Sirs:

The roses that I received last spring have all bloomed all summer, every one grew and did fine. Have a President Hoover in bloom now that is five inches across. Have had over 60 blooms off of Gruss an Teplitz and Talisman. Wouldn't take \$10.00 each for my President Hoover and Talisman if I couldn't get another one.

JOHN ELDRIDGE.

Talisman. Described on page 17.

Dame Edith Helen. We quote introducer's description verbatim: "The color is pure glowing pink, a self color throughout, from the time the bud opens till the petals fall, the shade changes hardly at all. The bloom which is carried on a rigid, erect stem, is very large and full, of perfect spiral form, and opens well in all weathers. It possesses the true old rose scent in the very highest degree." \$1.00 each.

Golden Dawn. A magnificent new Rose with which we have been most favorably impressed, an ideal garden Rose of an exquisite light lemon-yellow color. Its buds are of an ovoid form, heavily splashed with crimson before opening and develop into splendidly shaped full double, moderately fragrant flowers. \$1.00 each.

White American Beauty. Snow-white; flowers extremely large, yet beautifully formed. Blooms six inches broad are not uncommon. Growth is strong and vigorous, with abundant foliage. It is one of the very best bloomers in this division. 75c each.

Japanese Barberry Hedge.

Ornamental Hedges

A small amount of money invested in beautiful hedges will add more value to a country or town home property, dollar for dollar, than any other similar investment without exception. A hedge planted about the borders of a lawn will transform a heretofore bare looking spot into a place of beauty; and you can keep it low or let it go high, as a screen. City lots may be divided by hedging with fine effect. In dozens of different ways, which suggest themselves to the property owner, hedging may be used with great profit. A hedge is easily set, a little care will keep it in perfect condition and it is a wonder that more are not planted.

Can you imagine anything more beautiful and fascinating than a living fence? That's what a hedge is. How much more friendly than the old-fashioned wood and iron fences! As modern ways of planting call for a clear view of the house front, nothing is better than a neatly trimmed hedge along the borders of property. A walk or drive bounded by hedges is charming.

Amoor River Privet. This is the hardiest of all privets and especially desirable for planting in the North. Not subject to blight. In warm climates it is nearly evergreen, and even in the North the foliage remains far into the fall. Glossy green leaves. Privets may be trimmed to any desired height and shape. Price, heavy 2-yr. stock, 10 for 60c; \$5.00 per 100.

Ibota Privet. This variety has long been recognized as one of the best and most beautiful plants for hedges. It makes a quick, strong growth and is free from insects and scale. Leaves are dark, glossy green. Price, heavy 2-yr. stock, 10 for 75c; 100 for \$5.00.

Japanese Barberry. The Improved Thunberg's Barberry that is entirely free from rust and may be planted in any state. A beautiful plant, whether used for group planting, shrub masses or hedges. Foliage bright green, turning to reddish bronze in fall. Brighter colors obtained in a sunny location. Branches loaded with scarlet berries in fall that are retained during the winter. Price, 15c each; 8 for \$1.00; 100 for \$12.50.

Honeysuckle Hedge. Pink flowers, red berries. Ideal for high hedge. 18 to 24 in., 25c each; 10 for \$2.00.

Amoor River Privet Hedge.
Best for northern states.

SPECIAL NOTE: A unique hedge may be made by planting Japanese Barberry with Spirea Van Houttei (described on page 14). Alternate three Barberry then three Spirea Van Houttei and plant in a straight line. Keep the Spirea pruned to a height about 6 to 8 inches greater than the Barberry. We can furnish Ibota or Regel Privet hedge at same price as Amoor River.

Arbor-Vitae. Makes a neat beautiful hedge. It stands trimming well. Especially effective in winter. 12-18 in., \$20.00 per 100.

Norway Spruce. For Hedges and wind-breaks. 12-18 in., \$25.00 per 100.

Vines and Creepers

Nothing lends such pleasing effect to wall or veranda as the judicious use of vines. The hardy vine is best adapted for covering an unsightly wall or for furnishing shade and ornament to verandas. Hardy vines practically take care of themselves after they are once established.

Ivy - Ampelopsis

Virginia Creeper or American Ivy (*A. Quinquefolia*). A perfectly hardy, rapid climber, with large, five-lobed leaves which change to bright scarlet or crimson in autumn. 1 yr., 25c; 2 yr., 50c each.

Var. Engelmanni. Shorter jointed and having finer foliage than *Quinquefolia*. Clings to brick or stone. A good grower and hardy. The best for the North and Northwest. 1 yr., 25c; 2 yr., 50c each.

Boston or Japan Ivy (*A. Veitchii*). From Japan. It is a splendid plant for covering any object, as it clings perfectly to the smoothest surfaces. The foliage is a bright glossy green, changing to bright tints of scarlet, crimson and orange. Kills back some in a cold, dry climate. 1 yr., 25c; 2 yr., 50c each; 12 for \$3.50, postpaid.

Aristolochia

Dutchman's Pipe (*A. Sipho*). A native species of climbing habit and rapid growth, with magnificent light green foliage, ten to twelve inches in diameter, and curious, pipe-shaped, yellowish brown flowers; a splendid variety for archways or verandas. 1 yr., 25c; 2 yr., 50c each.

Boston Ivy.

Wisteria

Chinese Purple (*Wisteria Sinensis*). A most beautiful climber of rapid growth, and producing long, pendulous clusters of pale blue flowers. When well established it makes an enormous growth; it is very hardy; and one of the most supreme vines ever introduced. The very best vine to grow when it is desired to have it shade the upper part of the house. 1 yr., 25c; 2 yr., 35c each.

Honeysuckle - Lonicera

Lonicera Heckrotti. The wonder vine of the 20th century. Blooms all summer with pretty red flowers. Fine cover and foliage plant and very richly scented. If you are looking for a new vine and one that will give you pleasure all summer, include one of these in your next order. 2 yr., 75c each.

Common Woodbine (*Lonicera periclymenum*). A strong, rapid grower, with very showy flowers, red outside, buff within. June and July. 25c each.

Hall's Japan (*Lonicera Halliana*). A strong, vigorous evergreen variety, with pure white flowers, changing to yellow. Very fragrant; covered with flowers from June to November. 1 yr., 15c; 2 yr., 25c each.

Purple Wisteria.
1 yr., 25c; 2 yr., 35c each.

Clematis

A beautiful class of climbers, many of the varieties with flowers, 5 to 7 inches in diameter. Excellent for pillars or trellises; or when used for bedding, running over rock work or an old tree stump, they make an excellent show. They delight in a rich soil, a sunny situation; perfectly hardy.

Duchess of Edinburgh. A free-flowering, double white variety with medium-sized flower. 1 yr., 35c; 2 yr., 50c each.

Henryi. Fine large, creamy white flowers. A strong grower and very hardy, one of the best of the white varieties; a perpetual bloomer. 1 yr., 35c; 2 yr., 50c each.

Jackmani. The flowers when fully expanded are from 4 to 6 inches in diameter; intense violet-purple with a rich velvety appearance, distinctly veined. It flowers continually from July until cut off by frost. 1 yr., 35c; 2 yr., 50c each.

Madame Edouard Andre. Flowers large, of a beautiful, bright, velvety red; free-flowering and a continuous bloomer. 1 yr., 35c each.

Paniculata or Sweet-Scented Japan Clematis. A Japanese plant possessing unusually attractive qualities. Very rapid growth, quickly covering trellises and arbors with handsome, clean, glossy green foliage. Flowers are medium size, pure white, borne in immense sheets and of a most delicious fragrance. 1 yr., 35c; 2 yr., 50c each.

NOTE: Observe the low prices we are offering on large-flowered Clematis. We have extra heavy stock in above varieties and we are offering 2 yr. No. 1 plants at 50c each; three, your choice, at \$1.25, postpaid. Never before have we sold these for less than 75c and \$1.00 each.

Purple Clematis.
1 yr., 35c; 2 yr., 50c each.

Krider's Hardy Flowering Plants for Garden and Rockery

Hollyhocks.

Campanula—Canterbury Bells.

Hardy Chrysanthemums.

Perennial flowers give the satisfaction that comes from permanency. Year after year without any special care they bloom for you. If varieties are selected with regard to time of blossom flowers from early spring to late fall may be had. Remember the old-fashioned garden of your grandmother? It can be perpetuated in your rockery.

Price of all perennial clumps unless otherwise noted: Each, 10¢ per doz., \$1.50; per 100, \$12.00. Select as many varieties as you like to make up your dozen or hundred.

ACHILLEA (Milfoil or Yarrow). Plants suitable for dry, sunny places. The dwarf kinds are useful for carpeting or for rockeries; the taller varieties as border plants.

A. millefolium roseum (Rosy Milfoil). July to October. Rosy pink flowers in dense heads on stems 18 inches high. Effective on edge of shrubbery or in border.

A. ptarmica, The Pearl. Pure white, double flowers all summer. Prized for cutting.

ALYSSUM (Rock Madwort). Very popular for beds, borders and winter flowering; of easiest culture and very free blooming.

ANCHUSA (Alkanet). For producing a mass effect of brilliant blue the Anchusas cannot be surpassed.

AQUILEGIA (Columbine). As a cut flower the Long-Spurred Aquilegias are the daintiest of our outdoor grown flowers. They come in blues, whites and yellows, and shades of pink and rose.

DELPHINIUM (Larkspur). Delphiniums are the most beautiful hardy plants in cultivation, for they have such an immense variety of beauty and increase in size, in beauty, and often in quantity, year after year. They will bloom from spring until fall. We have dark blue, light blue, Gold Medal hybrids.

ASTILBE (Spirea). These stately Astilbes producing their graceful feathery spikes of flowers during June and July succeed best in a partially shaded position in rich, preferably heavy soil where they will not lack for moisture. Four colors.

DIANTHUS (Pinks). Hybrid Garden Pinks. Without the spicy fragrance of the Hardy Pinks a garden is incomplete. Their perfect form and rich coloring make them great favorites for summer bouquets. June.

DIELATRA or DICENTRA (Bleeding Heart). A hardy perennial with heart-shaped, rose colored flowers in drooping spikes. Each, 35¢.

CAMPANULA (Bellflower). A large and varied family of the greatest value. They are of the easiest culture, thriving in any ordinary garden soil.

C. medium (Canterbury Bells). Blue, rose, white.

Chrysanthemums

HARDY CHRYSANTHEMUMS. The inclusion of Hardy Chrysanthemums in your plantings makes it possible to have the garden bright with flowers after the majority of hardy herbaceous flowers are past. They are also valuable for cut flowers. The varieties offered below have been carefully selected and will give a flowering period of two months, from the middle of September until the middle of November.

Varieties Hardy Chrysanthemums—Fred Peel, Flora, Autumn Glow, red; Snowdrop, white; Mitzl, brilliant yellow; Indian Copper, red; Holmstead.

CHRYSANTHEMUM MAXIMUM (Giant Moon-penny or Shasta Daisies). Alaska, Extra large.

Columbine.

Statice or Great Sea Lavender.

PAPAVER orientale (Poppy). These are the regal representatives of this popular genus. No plant is more brilliant in late spring or early summer than the Oriental Poppy, with its large flowers, silken petals and flaming colors. Whether planted singly or in masses their large flowers and freedom of bloom render them very conspicuous in any location. Easy of culture and a considerable range of color. Orange; Mrs. Perry, salmon-rose; Bracteatum, rich blood-red.

COREOPSIS grandiflora (Tickseed). An improved variety with large, bright yellow flowers; one of the best hardy plants. Fine for cut flowers all summer long.

DIGITALIS (Foxglove). For stately and picturesque beauty it is not to be surpassed, and planted in masses in the garden among shrubs or naturalized on the edge of woods, in the orchards or along brooks, it is extremely effective and satisfactory. It is a biennial, but, as it renews itself from self-sown seed, it may be treated as a perennial.

GALLIARDIA grandiflora (Blanket Flower). Base of petals is scarlet-crimson, bordered golden yellow. A most beautiful combination; useful in assorted bouquets; valuable for table decoration.

GYSOPHILA paniculata (Baby's Breath). A beautiful old-fashioned plant possessing a grace not found in any other perennial and attracting the eye of everyone.

HIBISCUS (Mallow Marvel). Improved new hardy giant-flowering Marshmallows, the most free-blooming of all perennials; rich, gorgeous and hardy as an oak.

HOLYHOCKS. The Hollyhock is an old garden favorite, full of sentiment and association with a distant past. It is a plant of strong, vigorous growth and noble aspect.

LIATRIS (Blazing Star or Gay Feather). It blooms in midsummer and throws up long, narrow spikes of rich purple flowers, which last a long time.

PLATYCODON (Balloon Flower). June to October. Large, showy, deep blue flowers. Good for rock garden and border.

PYRETHRUM (Painted Daisy). Daisy-like flowers in white and colors. The flowers are borne on long stems and are fine for cutting. Fernlike foliage.

Shasta Daisy.

Pyrethrum.

Foxglove.

Special Bargain Offer In Perennials

We offer the 12 perennials illustrated on this page, which afford continuous blooming for the border, in rainbow colors, 2-year, field-grown, ready to bloom at **\$1.35**

If preferred, the dozen may be made up in any combination desired from the 12 perennials here illustrated. The customer may have one of each; or two each of six varieties, or four each of three varieties.

Delphinium.

Hibiscus.

Platycodon.

Coreopsis.

Hardy Phlox

We have no more satisfactory flowering plants than Hardy Perennial Phlox. Once planted they are permanent. Hardy as oaks. Require no protection, no petting, no coaxing. Free from disease and insects. Have immense heads of blooms of the most brilliant and delicate colors, which are produced in continuous profusion until cut down by severe freezes. Ordinary garden soil is all that is necessary. They are indeed the glory of the summer garden. We offer strong, heavy plants for immediate blooming. Our list is the best now known.

Ferdinand Cortez. Brilliant, rich and highly pleasing to the eye; French purple.

Champs Elysee. Fine rich crimson.

Eclairer. Bright carmine with light halo. Large flower.

Miss Lingard. Longest spikes of any Phlox—blooms from the the ground up; the earliest blooming, sweetly fragrant. Wax white, lavender eye.

Mrs. Jenkins. An early and free bloomer, one of the best tall varieties. Flowers pure white.

Phlox, Bridesmaid.

Rheinlander. A rare salmon-pink intensified by a distinct claret-red eye. Big flowers and truss.

Rosenberg. Extremely large florets in a loose truss; reddish violet or wine color; blood-red eye.

R. P. Struthers. Bright rosy carmine with scarlet eye.

Rijnstroom. A lively Neyron shade of rose-pink.

Bridesmaid. White with red eye.

Prices Hardy Phlox: Strong, vigorous, field-grown plants, the only reliable kind for immediate blooming. 15c each; 4 for 50c; \$1.50 per doz., postpaid.

Hardy Phlox.

SWEET WILLIAM (*Dianthus barbatus*). One of the most popular old-fashioned garden plants. Their freedom of blooming, striking colors and pleasing fragrance make them a favorite of all flowers. Fine for cutting. August and September.

Sweet William.

Scarlet Beauty, White Pearl, Newport Pink.

TRITOMA (Red Hot Poker or Flame Flower). A beautiful late flowering plant, having a handsome reed-like foliage. Flowers are of a rich orange-scarlet color 3 feet high. Blooms September to November. 25c each; 6 for \$1.25; doz., \$2.00.

Tritoma—Red Hot Poker.

Centerburg, Ohio.
May 19, 1931.

My Dear Mr. Krider:

The grafts came in fine shape. They are fine specimens and the balling ought to insure immediate growth. My customers as well as myself were delighted with them.

I am much pleased with the service and the trees.

Sincerely,

ORA GERHEART BEATTY,
15520 Croton Road.

Apricot Trees

Ripening as it does between Cherries and Peaches, usually about the month before the early peaches, the Apricot is a most welcome fruit, tempting and delicious. No garden should be without a few trees. In addition to its value as fresh fruit it is a superior fruit for canning and drying, vast quantities being used for these purposes every year. There is always a market for Apricots at good prices, and the planter need have no fear of over-production.

Prices of all varieties of Apricot trees, largest size, 2 yr., 4 to 5 ft., 75c each; 10, \$7.00. Medium size, 2 yr., 3 to 4 ft., 60c each; 10, \$5.00.

Alexander. Russian, an immense bearer. Fruit large, oblong, yellow, flecked with red; sweet and delicious.

Budd. Russian. Large, white with red cheek; sweet and juicy; strong grower, good bearer. Late.

Gibb. Russian. Medium yellow, sub-acid, rich and juicy, the best early sort.

Moorpark. One of the largest and finest Apricots. Yellow with red cheek. Flesh orange, sweet, juicy and rich; parts from the stone. Very productive.

Superb. Russian. Medium, roundish oval, smooth, light salmon with numerous red or russet dots, flesh yellow, firm, sub-acid and good; tree hardy and productive: middle of July.

Superb Apricots.

Quinces

Quince trees can be planted on low, damp, heavy soils where other fruits do not thrive. They require very little attention and are very profitable for market. No home garden is complete without a few Quince trees.

Price of Quince trees, 2 yr., 4 to 5 ft., 75c each; doz., \$8.00. 2 yr., 3 to 4 ft., 60c each; doz., \$6.00.

Champion. Good bearer; very large; good keeper; very productive. Bears extremely young.

Orange (Apple). Large; bright golden yellow; excellent flavor. Fine for domestic use. October.

Asparagus

The first garden vegetable of spring; it is a great delicacy and comes in just when it is most needed. One hundred roots will supply a small family and will last for years. Set the plants about eighteen inches apart in the row. Spread roots out in bottom of hole or furrow and fill in as plant grows, so that roots will be about 4 inches deep.

Champion Quince.

ASPARAGUS—Two Years Old

	Doz.	100	1000
Martha Washington	\$3.25	\$1.00	\$8.00

Improved Palmetto20	1.00	6.00
Columbia Mammoth White20	1.00	6.00
Conover's Colossal20	1.00	6.00
Martha Washington, 1-year-old50	3.50	

Rhubarb

Victoria. The old standard variety, large stalks. Doz., \$1.00; 100, \$3.00.

Linnaeus. One of the leading varieties grown here. Stalks not as large as Victoria, but earlier. Doz., \$1.00; 100, \$3.00.

Miller's Cream. For many years an old market gardener near Bristol had the early trade of Elkhart on pie plant; he had the largest, earliest and the best flavored pie plant that came to the city. Pies made from it had the flavor of peaches and it was called peach flavored. Since his death we have succeeded in obtaining the entire stock and have at this time 10,000 stalks. We are offering this to our customers at the same price as the common kind. Be sure and send for a dozen of this variety in your order. We call it "Miller's Cream" and will give \$25.00 for a dozen stalks that will excel it in size, season and quality. Doz., \$1.00; 100, \$5.00.

Asparagus,
Martha Washington.

Miller's Cream
Rhubarb.

Krider's Apple Trees

Apples should be planted in early spring or late fall. We recommend April and May for spring planting; October and November for fall planting throughout Indiana. The varieties we are offering cover the season from early to late. All of the varieties have been tested and we know they will prove satisfactory.

Almost any soil will suit the trees; however, best results will be obtained by planting in a rich, loamy soil. Clean cultivation, careful pruning and spraying will pay big dividends. Trees should be planted 35 feet apart each way, and for the first year or two the trunks of the trees should be protected from rabbits.

NOTE.—We propagate our Apples from scions cut from trees that are bearing fruit. Many nurseries use scions from the nursery rows and trees raised in this manner will not bear fruit until very old. Be sure you get trees that have bearing wood grafted on them.

Apples are going to be valuable in the near future, they bring a handsome price now and when the old orchards are gone they will nearly double the price received now and a good Apple orchard will be more valuable than an orange grove. True, some of us will not live to reap the benefits, but our children can not have a greater inheritance than a thrifty, bearing orchard, which will guarantee them a fine income annually.

We grow forty varieties of Apples, each one having certain characteristics which render them valuable. Those marked with an asterisk (*) are such as are most valuable in Indiana.

PRICES OF APPLES AND CRAB APPLES—Whole Root Process:

	Each	10	100
No. 1, 2 yr., 4 to 6 ft.	\$0.35	\$3.00	\$20.00
No. 1, 1 yr., 3 to 4 ft.25	2.00	10.00

We can furnish Dwarf Apples at the same price as Standard.

We can furnish 6-7 ft. trees for city planting at 75c each.

Summer Varieties

***Early Harvest.** Size medium, shape roundish, usually more or less oblate, smooth, bright straw color when ripe; flesh nearly white; flavor rather acid; fine. Season July. Productive. Needs rich cultivation to be fine. Good throughout the North and Southwest.

***Golden Sweet.** Medium or rather large, roundish, slightly flattened; greenish, becoming pale yellow; flesh very sweet, good, of moderate quality. The fruit is always fair, the tree a free grower; very productive. Tender for West. August.

***Liveland** (Liveland Raspberry). Color orange-yellow, striped, splashed gray dots through the color; flesh light yellow, often stained with red; fine, tender, juicy; core medium open; flavor sub-acid, good. This is the best early Apple grown in the North.

***Yellow Transparent.** Medium, white, changing to lemon-yellow, smooth, waxen surface; of good quality, with crisp flesh; very early, and, for an early Apple, an unusually good keeper. Valuable for market. July and August.

We sell 5 at 10 rate;
50 at 100 rate; 500 at
1000 rate.

**FOUR GREAT
VARIETIES
FOR PROFIT**

Winter
Banana.

Autumn Apples

*Duchess of Oldenburg.

The best known of the Russian Apples. Succeeds everywhere, even in the Northwest where most varieties fail, and yields well in all sections. Fruits large, rounded; tender, juicy, of the best quality for cooking and esteemed for dessert. Trees bear young, abundantly; very hardy. August and September.

Northern
Spy.

*Wealthy. Hardy, thrifty and good bearer.

Fruit medium, roundish, smooth, mostly covered with dark red; flesh white, fine grained, juicy; sub-acid; good quality, January. For market, desserts and cooking.

*Fameuse (Snow Apple). One of our finest dessert fruits. Of medium size, smooth, regular, deep crimson; tender, melting, delightful flavor. The tree is vigorous and hardy, succeeds especially well in the North. November to January.

*Maiden's Blush. Of uniformly large size, smooth, round, beautifully flushed with red on creamy yellow ground; flesh tender, of pleasant but not high flavor. A good market sort because of its attractiveness and the tree's heavy crops. September and October.

Winter Apples

*Baldwin. Large; bright red; crisp, juicy and rich; one of the most popular and profitable sorts for any purpose. Very productive. Keeps until April.

*Delicious. Large, with surface almost covered with a most brilliant dark red, blending to a golden yellow at the blossom end. Flesh fine grained, crisp, juicy, melting and really delicious. The tree is a hardy and vigorous grower and forms a strong, beautiful head, capable of bearing enormous loads and bears about the fourth year after planting. In keeping qualities it ranks with the best, coming out of storage in March and April in perfect condition.

*Grimes Golden. The standard of excellence, of the best quality, rich golden color. Flesh is yellow, very firm, crisp but tender, rich, aromatic and juicy. Medium to large. An ideal dessert and cooking apple. Tree is hardy, vigorous, upright grower, and a heavy, regular bearer. From November to March.

*Jonathan. A beautiful red apple, highly flavored and of excellent quality, being tender, juicy, spicy, and rich—a splendid family sort and highly profitable for market. Tree long-lived, productive, and an early bearer. November to April.

Mammoth Black Twig. The tree is a strong grower, a regular and abundant bearer. A good winter apple. Deep red; sub-acid, very highly flavored. Keeps until late spring.

*McIntosh Red. Season December and January.

Tree vigorous with spreading head; a good annual bearer. Fruit above medium to large, highly perfumed; smooth polished yellow, almost covered with brilliant solid crimson, a beautiful fruit; flesh snow white, crisp, very tender, sprightly, aromatic, sub-acid; very good quality.

*Northern Spy. Large roundish conical, often flattened, slightly ribbed; handsomely striped with red; flavor rich, aromatic, mild sub-acid, fine. To afford fine fruit, tree must be kept thrifty by good cultivation. A fruit of the highest quality, and profitable for market. December to April.

Baldwin.

Winter Banana, Delicious, Baldwin, and Northern Spy

WINTER APPLES—Continued.

Northwestern Greening. Season, December to March. Tree vigorous grower, hardy. Fruit large, green, becoming yellowish green when ripe; flesh yellow, fine grained and firm; flavor a good sub-acid; very smooth and attractive. One of the best growers we have in the nursery, and in the orchard is very prolific and regular when mature.

***Rambo.** Medium flat, streaked red and yellow; very tender, juicy and fine flavored. Tree an upright grower, hardy and productive. October to December.

***Rhode Island Greening.** Season, December to March. Fruit large and handsome, smooth, dark green overspread with yellow. Flesh tender, rich, rather acid, but highly flavored and excellent. Has long been popular in the Eastern states as a dessert apple and also for cooking; tree vigorous, spreading; heavy and constant bearer after reaching maturity.

***Rome Beauty.** Large, roundish, very slightly conical; mostly covered with bright red on pale yellow ground; flesh tender, not fine grained, juicy, of good quality. Ripens early in winter. The large size and beautiful appearance of this Ohio apple render it popular as an orchard variety. Attains highest perfection on medium soils—land neither too rich nor too poor.

Yellow Transparent.

***Stayman's Winesap.** Most profitable market variety. It has large size, bright red color, great productiveness and best quality to commend it. The tree is a vigorous grower, is irregular and drooping in habit, and adapts itself readily to different soils and situations. Drought resisting. Season, November to February.

Tolman Sweet. Season, December to March. Tree of vigorous, upright, spreading growth and very productive. Fruit above medium; whitish yellow, often with faint blush on sunny side; flesh white, firm, moderately juicy, fine grained, rich and sweet; quality excellent.

***Wagener.** Deep red; medium to large; flesh firm, sub-acid, well flavored. Bears young and yields good annual crops. December to March. More suitable for southern than northern Michigan.

Jonathan.

***Winter Banana.** An excellent variety, which has stood the severest tests. Tree is hardy and will succeed in very cold climates, its wonderful productiveness will bring quicker and larger returns than any other Apple in the orchard.

Crab Apples

Prices of all varieties same as standard apples.

For preserves, jelly, flavoring, canning, Crab Apples are very good. Also their tartness is agreeable once in a while when they are eaten fresh. The trees themselves are beautiful and when loaded with the bright colored fruit, are striking. They are an ornament to any grounds and look well beside the finest ornamentals.

Hyslop. Large; dark crimson, with bloom; very showy. Tree very hardy; late.

Transcendent. The largest Crab Apple. Red; showy; excellent. September to October.

***Red Siberian.** Large, red-striped. Fine for cooking; very hardy.

***Yellow Siberian.** Beautiful glossy yellow, shaded bright red; good size, clear, tart. October.

Rome Beauty.

Dear Sirs: Oneida, N. Y.
Received nursery stock yesterday by express. All in good condition and transplanted. Thanks for extra Evergreens. I am agreeably surprised and satisfied. Sincerely,
W. B. LINDSEY.

Cherries

In planting a Cherry orchard care should be taken not to plant the trees too close together; select a dry soil for the Cherry, as a rule, although it is so hardy a tree that it will thrive in a great variety of soils, yet a good sandy, or gravelly loam is best. Use same care in planting as other trees.

Orchardists are resorting more and more to the planting of varieties of Cherries that are strong pollenizers. Experience seems to demonstrate that such varieties as Black Tartarian, Bing, and Schmidt's Bigarreau are the best varieties to use for this purpose. Usually about one in every ten trees has proven to be the right proportion to use of these pollenizers.

Windsor Cherries.

PRICE OF CHERRY TREES

	Each	10	100
First class, 4 to 5 ft., $\frac{5}{8}$ to $\frac{3}{4}$ inch	\$0.50	\$3.50	\$30.00
First class, 3 to 4 ft., $\frac{3}{8}$ to $\frac{5}{8}$ inch	.40	3.00	25.00

Duke and Morello (Sour)

Dyehouse. This variety partakes both of the Morello and Duke wood and fruit. A very early and sure bearer; ripens a week before Early Richmond, is of better quality and productive. Free. May and June.

Early Richmond. Everywhere the most popular. Tree strong, thrifty grower, making a large symmetrical head; fruit medium size, dark red, melting, juicy; sprightly acid flavor and especially valuable for cooking purposes; tree an early and abundant bearer. Season last of May and first of June.

Large Montmorency. A fine, large, light red Cherry of the Richmond class, but larger and more upright grower, equally hardy and productive. Second only to Early Richmond in value. Ripens ten days later.

May Duke. A large, light red Cherry of most excellent quality. They are between a sweet and a sour Cherry. Fine for canning. The tree is a strong, upright grower.

English Morello. Medium to large, roundish; dark red, nearly black when ripe; flesh purplish red, meaty, juicy, slightly astringent and good; very productive. August.

Sweet Varieties

Bing. This grand new black Cherry was originated by Seth Luelling, of Milwaukee, Ore. Almost as large again as the Black Republican; flesh very solid, flavor of the highest quality; tree thrifty, upright grower, very hardy and productive; a fine shipping and market variety. First of July.

Black Tartarian. Very large; bright purplish black; half tender; juicy, very rich. Tree a remarkably vigorous and erect grower, and an immense bearer. One of the most popular varieties in all parts of the country. June.

Windsor. Tree upright, and a rapid grower; fruit large, roundish, oblong; very firm and juicy; flesh pinkish and sometimes streaked; quality very good; a productive bearer; has attracted attention owing to its large size and dark color; almost black. July.

Governor Wood. Large, heart-shaped; light yellow, marbled light red, juicy, sweet and rich. Tree vigorous, productive; forms a round head. An old variety that is still a favorite in many regions.

Napoleon or Royal Ann. A beautiful Cherry of large size; pale yellow with bright red cheek; flesh firm, juicy and sweet; one of the best for market and canning.

Schmidt's Bigarreau. The fruit is of very large size, of a deep mahogany color. The flesh is dark, tender, very juicy, with a fine flavor. Fruit grows in clusters. It is an excellent shipper. July.

We sell 5 at 10 rate; 50 at 100 rate; 500 at 1000 rate.

We sell 5- to 6-ft. Cherry trees, heavy planting size, for city trade at \$1.00 each.

Montmorency Cherries.

South Haven.

Choice Peaches

	Each	10	100
No. 1, 4-6 ft.	\$0.25	\$2.00	\$18.00
No. 1, 3-4 ft.20	1.50	15.00
No. 1, 2-3 ft.15	1.20	10.00

The Peach holds a place second only to the apple in the United States. It ripens over a long period and with proper selection of varieties a succession of fruit may be had throughout the summer and early fall. In a general way it may be said that the standard varieties of Peaches have a wider range of adaptability than the majority of apples and thrive on thinner soils; for example: Elberta is the leading variety in all Peach growing sections of the country—but no single variety of apple trees occupies the same position in its class as does Elberta. This fact is ample proof of the adaptability of the Peach.

Paradichlorobenzine. A sure cure for the peach borer. This remedy can be purchased from your druggist. If applied in September the following directions should be followed.

Remove the dirt from about the tree in a circle of 12-inch radius, apply paradichlorobenzine in a circle about 4 inches from tree, using a tablespoon to a 5-year tree, cover by mounding the dirt about the tree. The gas resulting from this preparation is a sure cure for the borer and will prolong the life of a peach tree five years.

Early and Midseason Varieties

Big Red (Freestone). Larger than Elberta. Rich red all over; flesh yellow, rich, fine grained and juicy. Stands shipping well. Tree hardy, vigorous grower, having large spread. Ripens middle of September.

Carman. In this new, hardy, rot-proof Peach, almost as large and fine as the Elberta itself, we have a Peach of great market value; a large, roundish Peach, with pale yellow skin, red blush on sunny side; white flesh; tender and melting; rich, sweet and superior flavor. A big, early, yellow-skinned Peach of high quality is sure to be in great demand. August.

Crosby (Free). Medium to large, orange-yellow splashed with red; flesh yellow, red at pit; juicy and rich; tree hardy and prolific; fruit should be thinned in order to make good sized Peaches; a popular market sort; middle of September.

The Four Greatest Varieties for Profit

J. H. Hale.

Carman Peaches.

EARLY AND MIDSEASON PEACHES—Continued.

Champion (Free). Large, round, quite regular; yellowish white, mottled with red on sunny side; flesh white with red at the pit; one of the best in quality. For nearby market and home use it is the best variety we know of. A good healthy grower and hardy in fruit bud. Fruit ripens from 20th of August to first of September.

Crawford's Early (Free). Large, roundish, bright yellow with red cheek; flesh yellow, juicy and sweet; quality good. August and September.

Early Elberta (Free). Larger than Elberta, though identical in form; bright yellow with red blush; flesh yellow, finer grained and sweeter than Elberta; ripens a week to ten days before Elberta; good shipper. Tree strong grower, hardy, good bearer. Last of August.

Elberta (Free). The great market Peach, perfectly hardy in the North and is believed to be the best all around Peach; color lemon-yellow with blush on sunny side; flesh pale yellow, tender and juicy; tree vigorous; a good shipping Peach. September.

J. H. Hale (Free). Fruit averages one-third to one-half larger than Elberta; ripens about five days earlier and is much superior in flavor. Color a beautiful golden yellow with deep carmine blush. Seems to do well over a wide range of territory. It is well worth planting. September first.

Kalamazoo (Free). Medium to large, oval, yellow striped with red and a thin bloom; flesh yellow, red at the pit, rich, vinous and of good quality. A valuable sort. September first.

Rochester (Free). Early midseason. Color lemon-yellow changing to orange-yellow, blushed with deep, dark red. Skin thick, tough. Flesh yellow stained with red near the pit. Very juicy, tender and melting. Sweet. Highly flavored. Very good in quality.

South Haven. The great hardy Peach for cold regions, stands 10 degrees colder weather than any other Peach grown. Large, yellow, freestone. Large as Elberta and a week earlier on the market. Of all Peaches for Indiana markets, this rules supreme. Plant for commercial purposes: South Haven, Elberta, J. H. Hale. All yellow, all freestone, all money makers.

LATE RIPENING

Crawford's Late (Free). Large, roundish oval, yellow with broad red cheeks; flesh yellow with red at the pit; melting, vinous and very good. Late September.

Gold Drop (Free). The almost translucent golden colored flesh of this Peach renders it exceedingly attractive in market, where it sells at highest prices. The tree is hardy and bears early; profitable. Late September.

Heath Cling. Very large, flesh white, juicy and melting. Good keeper and shipper. Ripens in October.

Salwey (Free). Large, roundish, deep yellow with rich red cheek; flesh yellow, firm and juicy; sugary; a valuable late market sort. First of October.

Champion Peach.

Middlebury, Ind.
Sept. 14, 1931.

The Krider Nurseries,
Middlebury, Ind.
Dear Sirs:

I am writing you to tell you that notwithstanding the low price of Peaches, many varieties selling at 20c and 25c per bushel, I am finding a ready sale for my J. H. Hale at \$1.00 and \$1.50 per bushel.

L. R. YODER.

Champion, South Haven, Carman and J. H. Hale

Standard Pears

The home orchard is not complete without Pears and they are a very profitable commercial crop in nearly all parts of the country. Pears will live on a variety of soils, but succeed exceptionally well in a hard clay soil. Tilling and fertilizing are advisable to a certain extent, but should not be carried far enough to produce too vigorous a growth. The quality of the Pear is much improved by picking before maturity and by proper ripening indoors.

Big profits are realized from Pear orchards—our trees produce first grade fruit.

PRICE OF PEAR TREES:

Select, 4 to 6 ft., 50c each; 10, \$4.00; 100, \$30.00. Select, 3 to 4 ft., 30c each; 10, \$2.50; 100, \$20.00.

Early Varieties

Bartlett. Large size, with beautiful blush next to the sun; buttery, very juicy and high flavored; tree a strong grower and a young and abundant bearer. August and September.

Clapp's Favorite. Large, ovate; skin thin, pale yellow, marked with crimson and fawn colored dots; flesh white, fine grained, juicy, sweet, vigorous, upright, buttery, rich and melting; very vigorous, upright grower. September. Very desirable in all sections.

Bartlett.

Seckel (Old-Fashioned Sugar Pear). Our most highly flavored Pear. Fruit small, yellowish brown, with a russet-red cheek; flesh juicy, melting, aromatic, with a rich spicy flavor; quality very best.

Flemish Beauty. One of the best varieties of Pears on account of its hardiness. The tree is a strong grower, an annual and abundant bearer, and is usually successful over a large range of country. The fruit is large; the skin pale yellow; the flavor is sweet and melting. Ripens in September and October.

Winter Pears

Garber. Equally as hardy as Le Conte or Kieffer; of same class of Pears. The growth and appearance are very much like Kieffer; ripens one month sooner and of better quality.

Lincoln Coreless. Originated in Lincoln County, Tenn. Fruit very large, handsome appearance, good quality and very few, if any, seeds. Almost clear of core and seeds, whence its name. One of the best keepers among winter Pears. Golden yellow; tree a good

grower and very productive. Has never been known to blight.

Kieffer's Hybrid. Originated near Philadelphia. Supposed to be a seedling of a Chinese Sand Pear crossed with the Bartlett. Size large, very handsome; skin yellow with a bright vermillion cheek; very juicy, with a musk aroma; quality good when ripened to perfection. Rather coarse grained, but one of the best Pears for canning or preserving. As near blight proof as a Pear can be called.

Duchesse d'Angouleme. A most dependable cropper, often fruiting the first season after planting. Fruit large, frequently weighing a pound. A dull greenish yellow, spotted russet; flesh white, rich and good quality. An all around profitable market Pear. October and November.

Extra select trees of above, 5 to 7 ft., for 75c each; city planting size.

Clapp's Favorite.

Duchesse d'Angouleme.

Plums

PRICE OF PLUM TREES:

No. 1, 5-7 ft., 75c each; 10, \$7.00; 100, \$60.00. 4-6 ft., 50c each; 10, \$4.50.

Plum pudding, yum, yum, plum preserves and plum pie. Do you have them in your house? Would you if you grew your own Plums? Why not? A Plum tree is hardy. Takes little room and produces abundantly.

No other fruit tree, unless it is the cherry, will produce more abundantly than a Plum tree. Although they will yield crop after crop despite neglect, Plum trees will readily show the result of care and modern methods of fruit growing. The commercial side of Plum production has received much attention in late years but the supply still falls far short of the demand. In general, Plum trees thrive best in a sandy or clayey soil. A distance of 16 to 18 feet apart is considered the best for Plum trees with the distance increased to 20 feet where a wagon spraying outfit is used. Many varieties of Plums produce so abundantly that the best results will be obtainable only by careful thinning. If allowed to grow naturally the trees will be weakened and the quality of the fruit will be inferior. We can recommend to the planter the following varieties:

Burbank Plums.

Bradshaw Plum.

Abundance. A nearly pinkish red Plum; ripens in midseason. Thrives everywhere. A regular and heavy bearer. No orchard is complete without it.

Bradshaw. A very large and fine early Plum, dark violet-red, juicy and good. Trees erect and vigorous; very productive; valuable for market. The quality is excellent, and it is destined to become one of the most popular of all Plums for canning, while its attractive color, good quality and shipping properties will cause it to be sought for as a market variety.

Burbank. Adapted to any soil and climate where any other Plum is grown. A profitable commercial Plum. Requires little care. Ripens in midseason.

Lombard. Medium; violet-red; juicy, pleasant; adheres to stone; valuable market sort; hardy; productive.

Monarch. Fruit dark purple, covered with a thin bloom; large size specimens measuring six inches in circumference; flesh pale greenish yellow, parting freely from the stone; juicy, with a pleasant flavor. A leading market sort. Vigorous grower. September.

Reine Claude. Small; yellow-green; flesh pale green, melting, luscious and of best quality. Mid-August.

German Prune. Large, dark purple, sweet. One of the best for canning. Excellent for drying. Plant a few trees and dry your own for winter use. Ripens in September.

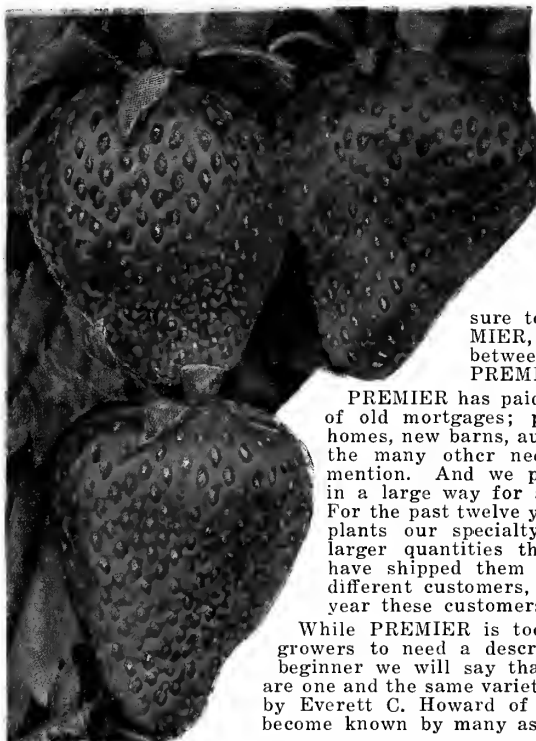

German Prune.

Strawberries

Premier

(Howard 17)

Premier.

No variety ever introduced to the public has received as much praise as the PREMIER. No variety has ever been grown in such quantity, and no variety has made anything like as much money for the growers. And while there are now being introduced some marvelous varieties, which are almost sure to take the place of the PREMIER, it is going to be hard parting between growers and their old friend PREMIER.

PREMIER has paid off thousands and thousands of old mortgages; purchased and paid for new homes, new barns, automobiles by the million, and the many other needy things too numerous to mention. And we predict that it will be grown in a large way for a great many years to come. For the past twelve years we have made PREMIER plants our specialty. We have grown them in larger quantities than any other nursery. We have shipped them to more than fifty thousand different customers, and over and over year after year these customers come back for more.

While PREMIER is too well known by the leading growers to need a description, however for the new beginner we will say that PREMIER and Howard 17 are one and the same variety. The variety was originated by Everett C. Howard of Belchertown, Mass., and has become known by many as Howard 17.

PREMIER begins to ripen early. Covers a very long season. Unusually large crops of large to very large berries, uniform in size and color.

Foliage strong and healthy, and not subject to disease. Grows well on any good rich garden soil in any part of the country.

Last, PREMIER has never been known to miss a single crop from late frost. Blooms seem to be more hardy than most varieties. When you plant PREMIER you plant frost protection also.

12 for 25c; 100 for \$1.00; 1000 for \$6.00, prepaid at 15c per 100.

Blakemore

Blakemore is an origination of Professor Beatty of the U. S. Department of Agriculture, Washington, D. C. It has been tested pretty thoroughly in most of the strawberry growing states, and every Station that we have had reports on speak very favorably of it.

Said to be a cross between Premier and Missionary. In plant growth it resembles the Missionary very much, being a strong grower of small size plants. The fruit is bright red, shading to a darker red when thoroughly ripe. Size medium, of a round to conical shape. Red to the center without green tips. Flavor excellent and very firm. In productiveness it can be classed with such varieties as Dunlap, which has always been first in this respect. Our stock of plants are from the original source, and have been both State and Federal inspected this season, and we hold a clean certificate.

12 for 50c; 100 for \$1.50; 1000 for \$8.00.

Blakemore.

All Strawberry plants postpaid at 15c per 100 or 90c per 1000.

**Mastodon
Strawberries.**

Mastodon The Marvelous Everbearing Strawberry

We have been growing Everbearing Strawberries for twelve years and have tried twelve varieties. We have eliminated all but one. This has given excellent results. It will yield as much as the common varieties in June and will produce well all summer and fall.

The reports we have from the actual growers of Mastodon sound almost unbelievable. Had we not seen field after field of this wonderful berry in bearing we would hesitate to tell you of its incredible productiveness.

We have seen, mind you, seen fields producing crate after crate of berries the size and color of which would astound you. Often 18 to 24 berries would fill a quart box. This was happening in July, August, September and October, when berries bring a price of 35c to 40c per quart on the market. An acre will produce the first season from 200 to 400 crates, not quarts, per acre.

You might think that berries of such size might be inferior in color and flavor. Not so. Many of our patrons have exclaimed at the fine flavor and rich color of these berries, even in October and November. A shortage at Thanksgiving is not unusual for the heavy foliage protects the berries from even hard frost.

Plant this berry for commercial use. It is the greatest fall money maker. We think that after this year we will catalog no other everbearer. That is our opinion of it.

Our stock came direct from the originator. In fact he brought us the plants himself in his Ford auto. Therefore, we know that your plants are genuine unmixt Mastodon. Special price while they last. 50c per doz.; \$2.00 per 100; \$12.00 per 1000. Prepaid at 15c per 100.

Washington

Guaranteed Genuine—

The Honeysweet Strawberry

When you see Washington, the "Honey Sweet" Strawberry, fruiting in your garden, you will see the most wonderful sight you ever have seen in strawberries. The plants are so heavily loaded with big, deep, dark red berries they are simply a blaze of color.

Words and pictures simply cannot describe this most remarkable strawberry.

Big? Yes. Many of the berries are much larger than the pictures shown here. The richest and sweetest strawberry ever grown. The juice is just like syrup.

The most amazing new strawberry ever brought out, new in color, new in size, new in taste—a real revelation in keeping qualities, a wonderful performing Strawberry. 12 for 50c; 100 for \$1.00; 1000 for \$8.00. Prepaid, 15c per 100.

All Strawberry plants postpaid at 15c per 100 or 90c per 1000.

Washington.

Kellogg's Big Late

Extra Late Pistillate (Female)

Best late Strawberry ever put on the market. Has received more compliments and praise than any other extra late variety on record. Absolutely dependable. Big grower, big producer of big berries. No variety either early or late will produce more berries or better berries than Big Late. As firm as any berries that ever grew. A splendid shipper and a wonderful keeper. Should be mated with some late bi-sexual (male). Fruits extra well in either narrow or wide matted rows. This berry is superior to Cooper in every way. It has healthy foliage and is a better flavored berry all around, fully equal in size to Cooper. We have discontinued growing Cooper in favor of Kellogg's Big Late. If you want late berries that will make you the money on your investment, plant Big Late fertilized with Pearl. 12 for 50c; 100 for \$1.00; 1000 for \$6.00.

Pearl. By many this has been referred to as "The Latest Strawberry Without a Fault." Unquestionably it is the latest, often ripening its fruits as late as the Fourth of July; and if it has any faults, we have failed to find them after growing Pearl for several years. The fruit is everything that could be asked for to make it an ideal market berry. It is large in size, dark red to the heart, firm quality, with a tough outer skin that gives it unusual firmness and keeping qualities. \$1.00 per 100; \$6.00 per 1000.

Senator Dunlap (Per.). This berry is of the Warfield type, has a perfect blossom, is hardy, productive, a splendid keeper and able to hold its own under any "rough and tumble" methods of culture to which it is likely to be subjected. It is a very heavy bearer of good size, even fruit of very beautiful dark red color. Special price, 12 for 25c; 75c per 100; \$3.00 per 1000.

Senator Dunlap.

Aroma (Per.). Large; dark red; uniformly roundish, heart-shaped; flesh firm and of very good quality. Stands shipping well; plants vigorous and very productive; blossoms rich in pollen and is good fertilizer for imperfect varieties. Late. 12 for 25c; 100 for \$1.00; 1000 for \$6.00.

Gibson.

Dr. Burrill (Per.). Fruit is large, beautiful, dark red in color, and of excellent flavor. Shape similar to the Senator Dunlap and ripens at the same time as the Dunlap; great canning berry. It is an excellent berry for the home garden or for the market. No better medium ripening berry than Dr. Burrill or Senator Dunlap. 25c per 12; 75c per 100; \$3.00 per 1000.

Gibson. Midseason. This variety has long been a favorite with commercial growers throughout the country. It is a heavy and sure cropper—in fact, during our many years' acquaintance with Gibson we have never known it to fail to produce a profitable crop. The plants are large and healthy, foliage strong, upright and abundant. Fruit is of the finest color, quality, flavor and appearance. Berries large—selling well on any market and mighty fine for home use. (Perfect flowering). \$1.00 per 100; \$5.00 per 1000.

All Strawberry plants postpaid at 15c per 100 or 90c per 1000.

Beauty

A new variety. This is a new variety of great promise. Has an exceptionally heavy foliage with lots of fine, long roots, making it very adaptable to dry sections. Has good keeping qualities. Berries very large, solid clear through. Very juicy and flavor of the finest. This fine color, high flavor and bright green calyx make it most attractive and command the best prices on the market. Originated in Three Rivers, Michigan, by a prominent nurseryman there. Beauty, the Strawberry that keeps well. Named "Beauty" because it is more beautiful than any Strawberry grown. Berries borne on extra long fruit stems. Ripens midseason. "Beauty" will make a beautiful row. A good plant maker. Fruit brings more money than Premier. 50c per doz.; \$1.00 per 100; \$6.00 per 1000.

Beauty.

Harvest King

Often known as The King of all June-bearing Strawberries. An exceptionally hardy, vigorous, self sustaining sort, unusually free from frost injury, and apparently capable of bringing a fine crop of fruit to maturity, almost regardless of weather conditions. Harvest King blossoms late, thereby protecting itself from late spring frosts, and then matures its fruit so rapidly that it ripens with Gibson, Senator Dunlap, and other varieties of similar season. The berries are very similar to Premier in size, color, shape and quality. It is claimed by the introducer that Harvest King is even more productive than either Premier, Gibson, Senator Dunlap or Dr. Burrill, and that it not only excels in a commercial way on account of its heavy fruiting tendency, and generous supply of large sized, deliciously flavored, deep red colored fruit, but on account of its superior canning qualities as well, claiming also that for this use it requires less

sugar than any other variety, and that it retains its original fine flavor and appearance, even after cooking. The plants are perfect flowering, requiring no other variety as a pollinizer. Foliage is healthy and abundant, furnishing ample protection to both blossoms and berries. Fruit stems are semi-rigid, holding fruit well off the ground when fully ripened. Remember, our stock is genuine Harvest King, bearing our usual guarantee of being absolutely true to name. 50c per doz.; \$1.00 per 100; \$6.00 per 1000.

The Quality of Strawberry Plants

In looking through the many catalogs you receive you will notice that many claim to be the largest growers of plants, and their plants are the best grown. We do not claim to be the largest grower of plants or that they are better than some others, but we have bought plants from some that make such claims in different parts of the country and have never received any better than we send out. In some cases we had to throw away half of the plants as they had the crowns broken or were so small that they were not worth planting. We guarantee the plants we send out to be as large and as fine as you get anywhere (no matter what you pay), and to be up in as good condition and if grown side by side, under like conditions, that they will produce as much and as good fruit.

We have a branch nursery between Constantine and Three Rivers, Mich., twelve miles from our office, that we devote exclusively to the growing of Strawberry plants. This farm is equipped with irrigation so that the plants never suffer from want of water and become stunted during drought. This soil is particularly adapted to Strawberry plants, growing long, fibrous roots like the photograph shown herewith.

We pack our Strawberry plants in slatted crates and ship the same day they are dug, working a night force at our packing house for this purpose. We guarantee our plants to reach the customer in a satisfactory condition.

ALL STRAWBERRY PLANTS, POSTPAID AT 15c PER 100 OR 90c PER 1000.

Concord.

Niagara.

Agawam.

Selected Grapes

Hardy varieties—prime favorites everywhere. It is one of the oldest fruits in existence, yet the demand seems to grow every year beyond all expectations. There is in the Grape the good savory qualities that make it popular for eating as fresh fruit, and the uses to which it can be put in canning and jelly making are almost without number. Also the best of the rich wines are pressed from Grapes.

Grapes can be grown by anyone who has a garden or yard, and a little time to give to it.

Price, No. 1 vines, except where otherwise noted, 15c each; doz., \$1.50; 100, \$10.00. All vines heavy, 2-year-old. Special prices on Niagara and Concord.

Red Varieties

Agawam. Bunch large, shouldered; berry large, reddish brown, tender, vinous and of excellent flavor. Very vigorous and productive and one of the best of its class.

Brighton. Bunch large, shouldered; berries medium to large, round, dark red, tender very little pulp, sweet, juicy, slightly aromatic and very good. Ripens early.

Delaware. The bunches are small, compact, and sometimes shouldered; berries are small with thin but firm skin; flesh juicy, very sweet and refreshing and of the best quality for both table use and for wine. Ripens with Concord or a little before; vine is hardy, productive and a moderate grower.

Salem. Bunch large and compact; berry large, of a light chestnut or Catawba color, thick skin, perfectly free from hard pulp; very sweet and sprightly with a most exquisite aromatic flavor; as early as Worden; keeps well.

White Varieties

***Niagara.** Occupies the same position among the white varieties as Concord among the black. Bunch and berries large, greenish white, changing to pale yellow when fully ripe. Skin thin but tough; quality much like the Concord. Each, 10c; 100, \$6.00.

***Pocklington.** Seedling from Concord. The vine is thoroughly hardy both in wood and foliage; it is a strong grower, never mildews in vine or foliage. The fruit is a light golden yellow, clear, juicy and sweet to the center, with little or no pulp; bunches very large, sometimes shouldered; berries round, very large and thickly set. Ripens with the Concord.

Black Varieties

Campbell's Early. A new, very large and fine early black Grape. Strong, vigorous, hardy vine with thick, healthy leaves; clusters very large, usually shouldered, compact and handsome; berries large, nearly round, black, rich, sweet, very good; skin thin; seeds few and small, parting easily from the pulp; good shipper; ripens very early but remains sound on vines for many weeks. This makes it one of the most satisfactory and profitable market sorts to grow.

***Concord.** One of the most popular and reliable varieties we possess; bunch large, compact and shouldered; berry large, round, almost black with blue blooms, juicy, buttery and very sweet. Each, 10c; 100, \$6.00.

Moore's Early. A large Grape, ripening a week earlier than Concord; good grower; berries large, good quality, and makes a moderate yield; very valuable as an early Grape.

Worden. Seedling of the Concord which it greatly resembles in appearance and flavor, but the berries are larger. The fruit is said to be better flavored and to ripen several days earlier. These qualities will give it the foremost rank among native Grapes.

Worden.

NOTE.—1-yr., No. 1 vines of Concord and Niagara at 6c each; \$3.00 per 100.

Quillen Raspberries—Disease Proof.

Raspberries

Loose soils produce the best Raspberries. Partial shade is no hindrance to productiveness, as the natural habitat of the Raspberry is in lower ground, filled with leaf mold and partly shaded. For this reason along higher fences and in between the young orchard trees, Raspberries are likely to thrive. Allow not more than five good canes to develop to the plant, and pinch out the tops of these when they attain a height of 2½ to 3 feet in order to encourage laterals.

Both red and black Raspberries are sold only in bunches of 25 plants. Less than this number is hardly worth the trial.

Black Varieties

Per 25, 90c; per 100, \$3.00; per 1000, \$20.00 (except Quillen).

Quillen. This is the greatest variety of black Raspberry grown in the United States today. Ripens about two days later than Cumberland; is the largest Blackcap that has ever been grown here. It originated south of Indianapolis, a cross between Cumberland and Hopkins. We highly recommend this variety for several reasons: First, it has never shown any diseases in the eight years we have had it on our grounds—no anthracnose, no mosaic. The original field planted eight years ago is in a clean healthy condition. All the Cumberland fields invariably pass out in three years time of the anthracnose. If you want the best, get a start of Quillen. Per doz., \$1.00; per 100, \$5.00; per 1000, \$35.00.

Cumberland. Largest black Raspberry known; unusually strong grower, perfectly hardy. The most profitable Raspberry grown.

Red Varieties

Per 25, \$1.00; per 100, \$3.00; per 1000, \$20.00.

By parcel post, 15c per 50 additional.

Cuthbert. Crimson, large, conical, firm and juicy. The canes are upright, strong and vigorous. Hardy. The standard late red market and home variety that is popular and unsurpassed.

King Red. Bright scarlet, sweet and melting. This early red is the best of its season because of hardness, productiveness and general good qualities. Ripens two weeks before Cuthbert.

St. Regis. The so-called everbearing. It does produce some berries throughout the summer, and in the spring is an excellent producer. Quality very good.

Latham. The Finest Red Raspberry Ever Produced. There are so many fine qualities in the Latham Red Raspberry that we never know where to start. First, it is extremely large in size, larger than all of the common reds, and when ripe is a beautiful bright red color. Then, in addition to this unusual size, it is the hardiest of all Raspberries, giving fine results even to the Canadian line. Its flavor is truly delicious and the crop is remarkably heavy, sometimes extending over a month. In every way, the Latham stands supreme. Prof. C. V. Holsinger, Extension Professor of Horticulture of the Iowa State College, Ames, Iowa, says: "I only hope you will be able to grow plants enough to put

this berry in the hands of as many people as possible."

Latham Raspberries are a beautiful, thrifty lot, guaranteed to be entirely free of the mosaic. They have been rigidly inspected three or four times by experts who pronounced them supremely healthy, and mosaic free. Order your wants early.

Bargain price, \$1.00 per 12; \$2.00 per 25; \$4.00 per 100; \$30.00 per 1000.

If desired by parcel post, add 10c for 12; 15c for 25; and 20c for 100, to cover packing and postage.

Latham Raspberries.

Eldorado Blackberries.

Blackberries

Blackberries do best on good soil, clay and sand mixture preferred, set in rows 6 feet apart and 2 feet in the rows. 3,500 are required per acre. Blackberries are in great demand now at 20c per quart. Give the boy a chance to try his mettle by letting him start a patch. He won't have any desire to leave the farm if he is successful in raising fruit. The varieties here given are perfectly hardy and will prove a source of profit. Beware of the Erie, Wilson, Jr., Lawton and their like; they will not stand our winters.

Eldorado. Largest hardy Blackberry grown. Free from rust and the best money maker here. Berries of the Eldorado bring 50c per crate more than Snyder on the local market. Doz., 50c; 100, \$3.00; 1000, \$18.00.

Blowers. Very large, finest flavor and jet black. Canes grow upright, perfectly hardy. This variety is one of the most productive under cultivation. Begins to ripen in July and continues late. Sells for highest market price. Doz., 75c; 100, \$3.00; 1000, \$20.00.

Currants

Fay's Prolific. Berry averages large, juicy and less acid than Cherry; bush not quite so strong a grower. Each, 10c; 100, \$6.00.

London Market. Bush vigorous, upright; fruit medium to large; color dark red, with sprightly acid flavor; very productive. Each, 12c; 100, \$6.00.

Perfection. The latest introduction, being a cross between Fay's Prolific and White Grape, combining the best qualities of both. Berry bright red and large. The clusters average longer and the size of berry is maintained to the end of bunch. Its quality is said to be superior to anything in the market today, being a rich, mild sub-acid flavor with plenty of pulp and few seeds. Each, 15c; 100, \$10.00.

Cherry Currant. Red, sub-acid, very large. Is prolific and a good variety for home use or market. 2-yr. vines, 15c each; 100, \$10.00.

Wilder. Leading Currant in southern Michigan where it is largely planted for commercial uses. 2-yr. vines, 15c each; 100, \$10.00.

Red Cross. A strong growing variety; exceedingly productive with long clusters. The currants are of large size and far sweeter than ordinary varieties.

Perfection Currants.

Gooseberries

This fruit is very useful for cooking either green or ripe, and is used for canning extensively. Requires the same cultivation and treatment as currants. The surest method to prevent mildew is to plant thickly in the rows and mulch deeply, six or more inches, with straw, tan bark, coal ashes, etc. Plantations thus treated have borne large crops for twenty years. The mulch retains moisture in the driest weather; the few weeds that push up are easily pulled, and the fruit is large and more evenly ripened. Price all varieties, 20c each; 100, \$10.00.

Downing. Fruit large, round, light green with distinct veins, soft, juicy and fine flavored; vigorous and productive; smooth skin; one of the best.

Downing Gooseberries.

Houghton. Medium size, pale red, sweet and juicy; vigorous grower, abundant bearer and free from mildew.

We sell 50 at 100 rate; 500 at 1000 rate.

FEDERAL QUARANTINE ON CURRANTS AND GOOSEBERRIES

The Government has established a quarantine, forbidding nurserymen from shipping Currants and Gooseberries into Nebraska, the Dakotas, Kansas, Oklahoma, Texas, and all other states west of this line.

Rock Garden Plants

No garden is complete nowadays without its rock garden and the hardy rock plants that so much enhance the collection of perennials that furnish color and picturesqueness to our plantings. Even the tiniest of gardens have gems of miniature gardens, and more pretentious estates show you with pride rare specimens that cause the visitor to gasp with pleasure. Be sure to use enough plants to hide the rocks. Avoid the appearance of a rock pile.

Our selection of rock plants includes those hardy kinds that respond to care and do not have to be pampered. With ordinary attention they will thrive for you. What a kick one gets out of building a rock garden. Why not try it?

Prices, unless otherwise noted, of all rock plants: Each, 20c; 6 for \$1.00.

Ornamental Grass.

IBERIS (Hardy Candytuft). Most desirable dwarf plants, 8 to 10 inches, with evergreen foliage, which is completely hidden with dense heads of flowers early in the spring.

IRIS pumila. These beautiful little Irises do not grow over 4 inches high, and bloom in April and May. They are fine for bordering flower beds or planting in front of the tall Irises.

MYOSOTIS alpestris (Alpine Forget-me-not). Splendid for naturalizing in dry places; also for beds, borders and rockeries.

PACHYSANDRA terminalis (Japanese Spurge). A trailing plant 6 to 8 inches high, forming broad mats of bright glossy green foliage. A ground cover which will grow in all shady situations and the only plant which will thrive under pine trees.

PHLOX subulata (Moss or Mountain Pink). An early Spring flowering type with pretty mosslike, evergreen foliage, which, during the flowering season, in April and May, is hidden under the masses of bloom. An excellent plant for the rockery, the border, and invaluable for carpeting the ground or covering graves.

Hardy Violas.

ACHILLEA tomentosa, 6 to 8 inches. July to September. Bright yellow flowers. Excellent for rockeries.

AETHIONEMA grandiflora (Persian Candytuft). Strong, twiggly bushes, covered with long, slender spikes of rosy pink flowers. One of our best rock plants. Each, 30c; 3 for 75c.

ALYSSEUM (Rock Madwort). Very popular for beds, borders and winter flowering; of easiest culture and very free blooming.

ARABIS alpina (Rock Cress). Pure white flowers produced in dense masses; splendid for border and rockery work.

ANEMONE japonica (Japanese Anemone). Valuable plants suitable for massing or single specimens.

AUBRIETIA (Rock Cress or False Wall Cress). One of the daintiest and most delicately beautiful of all dwarf, creeping plants for carpeting beds or rockeries.

DIANTHUS plumarius (Clove Pinks). For border or rock garden. It will bloom continuously if flowers are cut off when they begin to fade.

GYPSOPHILA repens (Baby's Breath). Beautiful trailing plant.

HEPATICA coerulesa. A pretty native, spring flowering plant with blue flowers.

Iberis.

SAXIFRAGA cordifolia (Megasea). These will thrive in any kind of soil and in any position. Grow about 1 foot high and fine among rocks or ledges.

SEDUM (Stonecrop). Dwarf varieties. America's greatest rock plant. Suitable for the rock garden, carpet-bedding, covering of graves, etc.

SEDUM Sieboldi. Round, succulent, glaucous foliage; bright pink flowers in August and September.

SEDUM spurium coccineum. A beautiful rosy crimson-flowered form. July and August. 6 inches.

SEDUM Stahlii. Very fine rock plant.

STRIPED ORNAMENTAL GRASS. Ideal for rockery and pool. Clumps. 15c each; 6 for 75c.

VIOLAS, HARDY. Yellow, white and blue. 15c each; 6 for 75c.

YUCCA filamentosa (Adam's Needle). Among hardy plants there is nothing more effective and striking. It is also indispensable for the rockery. Each, 35c; 3 for \$1.00.

The Krider Nurseries, Inc.,
 Middlebury, Ind.

Canton, Ohio.
 Sept. 29, 1931.

Dear Sirs:—The roses purchased from you last spring arrived in good condition, were planted according to instructions and have all made an excellent growth this season. Every specimen was in bloom at some time during the summer and we are very well pleased with them.

Yours truly,

W. R. ADLER,
 1303 - 12 N.E.

Water Lilies and Water Plants

Water Lilies are one of our leading specialties. We have constructed many pools the past two years and have them well stocked with the following hardy varieties. The stock we offer our customers are well established plants which we guarantee to bloom six weeks after planting, May shipment. Do not confuse with cheap bulbs.

Alba Grandiflora. Pure white, large blooms and a rampant grower, very fragrant. The best of all white varieties. Each, \$1.50, postpaid.

Opal. Large bloom, delicate pink shade, very fragrant, very hardy. Grows rapidly. Each, \$1.50, postpaid.

Chromatella. Highly popular yellow variety, extra large blooms and three to five buds in bloom all the time. Very popular. Each, \$2.00, postpaid.

Rose Arey. Beautiful fragrant variety with a color so dark pink that it is classed in the red varieties. Excessive bloomer, very fragrant. Each, \$2.00, postpaid.

Gloriosa. This is the grandest of all Water Lilies. Leaves and flowers only about one-half the size of the others but the color blood-red and the fragrance equal to the sacred lilies of the river Nile. Each, \$3.50.

SPECIAL ON WATER LILIES

One each of above 5 varieties in large clumps, postpaid for \$8.00. \$10.50 value. These 5 varieties will fill a pool of 40 sq. ft.

The above illustration was made from lilies in bloom in our pools, summer of 1931. Varieties shown are Alba Grandiflora, Chromatella, Rose Arey, and Gloriosa. Opal was not in bloom at that time.

Block of Rhododendrons and Grafted Evergreens in Our Nursery.

Wholesale Prices on Evergreen Sizes Suitable for Home

Every year finds an increasing number of planters interested in small evergreens suitable for starting a home nursery. These trees are intended for planting out in your garden where they can be cultivated and allowed to develop before being used in their permanent location. The use of small evergreens gives everyone an opportunity to enjoy beautiful evergreen trees at the minimum of expense.

A small investment in baby evergreens will repay you a hundred times, both in

Mastodon Strawberries.

Mastodon Strawberry

The most popular of all everbearing strawberries. It is of immense size, sure cropper, of choice quality, and a vigorous grower. These qualities make Mastodon the ideal berry to plant.

Quillen Raspberry

The new jet Black Raspberry. A wonder for heavy fruiting. A strong sturdy grower, yet free from mosaic and all diseases common to Black Raspberries. It ripens about a week later than Cumberland, thus prolonging the fruiting season.

New Quillen Blackcap.

Latham Red Raspberry

Although comparatively new, this remarkable and very desirable variety leads the field. Latham is perfectly hardy and absolutely free from mosaic and injurious diseases. Its production is superlative, with immense yields. The berries are large and round with profitable shipping qualities. In color it is a rich brilliant red.

Small Fruit Garden Offer
